**Parts included with the Installation of a Washer: (Parts are included only when installation is performed)**

Nylon braided water inlet hoses

#### **Services included with the Installation of a Electric Range:**

- The delivery provider will cover finished floors with a protective material to limit the possibility of property damage.
- The delivery provider will haul away old unit if customer request, (like product only), or move to another location. Up or down one floor.
- The delivery provider will attach pedestal if purchased and delivered with appliance.

#### **Obstacles that could prevent the installation:**

- The delivery provider will only deliver if the person receiving the delivery is 18 years of age or older.
- Only new parts provided by the delivery provider are allowed. Existing parts or other obtained elsewhere cannot be used.
- The delivery provider will remove only exterior doors (Hinge pins) to gain access; we will not remove interior doors, hand rails, banisters, screen doors, or move customers possessions to perform services.
- Electrical outlet must be securely attached to wall or floor and meet National Electrical Code requirements for Washer.
- Cabinet opening must be large enough for appliance to be installed. No cabinet modification will be made.
- Old product must be free of any clothing or debris.
- The delivery provider will not attempt to connect to any water shut off valves further than 6' away from the appliance.
- The delivery provider will not attempt to connect to any drain line further than 6' away from the appliance.
- The delivery provider will not reconnect or reuse any existing waterlines or drain lines.
- The delivery provider will not connect to hot and cold water supplies or drain pipes that are not at least 30 inches above floor.
- The delivery provider will only turn the water off at the specific valve we attach our water lines, we will not turn off house main water valves.
- The delivery provider Delivery Installation Specialist reserves the right to refuse to disconnect or connect to any water valve they feel is in an unsafe or inaccessible location.
- All water shut off valves must be operational; the Delivery Installation Specialist reserves the right to determine if the water shut valve is operating correctly.
