TMD01USB

Twinkly Music – Bluetooth and Wi-Fi USB-Powered Sound Sensor for Twinkly Smart LED Lights to Sync to Music

DESCRIPTION

Watch your lights dance to Twinkly Music, a USB-powered sound sensor featuring a highly accurate BPM counter and a smart microphone that listens to and interprets ambient sounds in your space, syncing your Twinkly smart LED lights to any recorded or live music or sounds played in the vicinity.

FEATURES

Manage Twinkly Music using the free Twinkly App for iOS and Android

Enjoy easy setup in a matter of seconds via Bluetooth® and Wi-Fi

Experience a one-of-a-kind audiovisual experience. Equipped with a highly sensitive digital microphone and powerful multicore DSP, Twinkly Music analyzes any music in the vicinity and applies matching effects synced up to your lights

Just press the button on the Twinkly Music USB device to change the effects and lights on your music, creating the perfect mix of sound and lighting for parties, weddings, dinners with friends, live concerts and any occasion

Best for use with Generation II Twinkly products, Twinkly Music works with groups of lights and can be configured for selected devices

HIGHLIGHTS

· USB-powered device
· Connects with Twinkly App, free for iOS and Android on mobile and tablet
· Instant Wi-Fi and Bluetooth® connection
· Dozens of unique light effects that sync with music
· Works with all Twinkly devices
· Indoor use only – IP 20
