

Shopper and Associate Safety

- **Leverages insights** to help **improve** shopper & associate safety and mitigate potential liability claims
- **Deploys** a comprehensive set of **computer vision** AI / ML capabilities to help detect, communicate and correct safety and security concerns
- **Provides real-time notifications** of safety and liability issues so immediate intervention can occur helping retailers maintain a safe and secure environment
 - Monitors for **slip and fall** activity so assistance can be provided and helps identify **potential false injury** claims which can be costly
 - Monitors for **exposure risk** associated with blocked emergency exits which pose both safety & violation risks
 - Monitors critical engagement areas for customers exhibiting threatening or aggressive behavior so the situation can be **managed and diffused** appropriately
 - Monitors for individuals who **loiter** in a predefined area for an extended time period. Helps stop **potential criminal activity**
