

The Next Evolution in RFID Tags

Radio Frequency Identification Seam Tag

Combat shrink throughout company-wide operations

Streamline omnichannel order fulfilment processes

RFID seam tag, sewn into garment's inseam

Supported use cases

- ✓ RFID Service Bureau
- ✓ Source tagging
- ✓ E-commerce
- ✓ Loss prevention
- ✓ Inventory management
- ✓ Supply chain management
- ✓ Self-checkout
- ✓ Returns management

What are RFID seam tags?

RFID seam tags offer a forward-thinking solution that is tailored for retailers in search of a discreet tagging alternative. Engineered with a sleek structure that preserves the tactile integrity of a garment, these tags integrate seamlessly into its inseam without compromising its texture.

By incorporating RFID seam tags during the manufacturing phase, retailers are able to unlock a wealth of insights across the entire supply chain.
