

Shrink Management

- **Leverage predictive analytics** and **insights** to take **preventative** actions to reduce shrink and criminal activity
- **Combat** ORC activity and **pinpoint** where the next hotspot is likely to be using geo-mapping to identify loss event patterns
- **Optimize** and plan **staffing** to align with the most vulnerable store hours for theft activity
- **Deter criminal activity** and receive **real-time notifications** of potential bad behaviors such as shelf sweeps, criminal tool use, groups or mobs entering a store, and interaction with high-value items.
