

Sensormatic RFID Service Bureau

Benefits of Source Tagging with an RFID Service Bureau

Easy to Setup and Operate

Personalized RFID tags are delivered to the manufacturers and attached to the garments. Manufacturers order tags themselves

Reliable Tagging Solution

High level QC on tags, encoding and serialization improves RFID solution performance

Labor Savings

Tag attachment is typically done in lower cost countries, during attachment of other product labels, on unpacked items. Store staff can focus on customer service

Reduced Shrinkage

Serialized RFID tags increase control on internal theft, grey and black markets

Digitalized Supply Chain

RFID provides visibility and reduces shipment errors across the entire supply chain

Low CAPEX

Retailer nor their manufacturing partners do not need to invest into RFID tag printing and encoding equipment

Sensormatic RFID Service Bureau – Value for Customers

True Retail RFID Expertise

Sensormatic is the leading RFID solutions provider. Sensormatic has served retailers for more than 50 years, has installed RFID solutions to more than 5000 stores, DCs and factories and has sales and delivery capabilities in more than 100 countries

End-to-End Solution from One Responsible Party

Sensormatic offers a full solution including tags, service bureau and RFID solution. This makes implementation project management easy and risks low. Serialization management covers service bureau, in-plan printing (factories, DC) and handheld encoding in stores

High-Performing Future Ready Solution

Tag delivery formats cover single-use, embedded and reusable applications. Tags are designed and certified for TrueVUE use-cases. This lowers the implementation risks, ensures highly performing solution and enables easy solution expansion. Tag ordering is simple with Sensormatic Service Bureau Portal and provides visibility into orders

High Volume RFID Tag and Data Management Experience

Sensormatic designs, converts, prints and encodes RFID tags inhouse. Service bureau sites are in Brazil, Spain, Mexico and China with expansion program underway. Annually Sensormatic manages some 1.75B encoding events
