PALISADES II

endless possibilities

An elegant expression of
architecture within architecture

Inspired by the great mid-century modernist designer, Muriel Coleman from California, Palisades II brings Coleman's light, harmonious aesthetic into the ever-evolving workspace to divide and zone space in a unique and visually expressive way. And there's no limit to what these zone divisions can create. The hugely flexible system of Palisades II presents endless possibilities and can find a part to play in every interior...
