

English & Easy Artificial Intelligence

This course will benefit:

Teachers who are non-native speakers of English, who are required or intend to use English and AI tools in their teaching

Other school and adult education staff who wish to improve their English and learn how to apply AI in everyday educational tasks

Those who need to develop their English language skills to access and understand literature, resources, and publications on Artificial Intelligence in education

Staff needing to work on Erasmus projects, exchange programmes, or committees with an international dimension, where English and AI-based tools can enhance communication and project outcomes

Those who need to liaise with English-speaking colleagues, peers, or parents and who would benefit from using AI to support clear, effective communication

Objectives:

To improve individual competency, language skills and fluency in English language in a multi-national environment

To deliver key language and communication skills to those working with English in educational, social, and vocational contexts

Understand the concept of AI Learn key tech vocabulary

Learn to use every day digital tools

Exposure to different AI platforms and their use

Learn how to ask questions to AI tools (chatbots, translation tools, smart devices) in English

To sample and enjoy Cypriot history and culture

To provide the platform for participants to acquire language skills to be able to teach and communicate in English more efficiently

Preparation - Pre-course preparative modalities:

Needs analysis

Online resources for pre-course, arrival and cultural information

Online language level assessment through the my.Bayswater platform

Practical arrangements - Intra-course modalities offered by the course provider:

Course tutor

Pedagogic learning materials included

Setting of learning objectives

Ongoing assessment and evaluation

Guidance and advice on homework exercises

Accommodation service & pastoral care: 24hr weekend emergency contact

City orientation tour

Optional cultural activities and visits

Access to my.Bayswater platform (for solo English language study)

For teachers and educators using English as a foreign language and AI

Course ref: EPCY 12
English & Easy Artificial Intelligence

EPCY 12.1 One-week

EPCY 12.2 Two weeks

Entry level:

- › Minimum level CEFR A1

Language of tuition:

- › English

Daily teaching sessions:

- › Morning: 4 x 45 minutes (3 hrs) daily
- › Afternoon: 2 x 60 minutes daily

Total course contact hours:

- › 1 week: 25 hours
- › 2 weeks: 50 hours

15

Maximum
class size

Follow up provided - Post-course modalities:

Digital certificate of achievement

Validation of Europass Mobility

End-of-course test and programme evaluation

Post-course access to my.Bayswater platform for 3 months

Course content and strategies:

General English

The key concept is communication. We use task-based, collaborative and humanistic approaches to create a positive learning environment where the focus is on practical classroom activities. All aspects of English language skills are covered – speaking, listening, reading, writing and mediation, as well as pronunciation vocabulary and grammar activities through a variety of mediums.

AI - Module

Students will combine English language development with the practical use of Artificial Intelligence tools in education and daily life. Using task-based and collaborative methods, participants improve their communication skills (speaking, listening, reading, writing, mediation) while learning to use AI for simple classroom tasks, translation, and interaction. Activities include creating short projects with AI (quizzes, worksheets, lesson ideas), practicing English by talking to AI tools (ChatGPT, Google Translate, Siri/Alexa), and discussing familiar technologies (smartphones, apps, recommendations). A supportive, international environment encourages sharing of experiences and ideas. Progress is monitored through self-evaluation, tutorials, and guided feedback, ensuring participants leave with both improved English and practical AI skills for their professional context.

Sample programme: *This is a sample of a schedule which can be adapted to suit the participants' needs.*

Week 1	Day 1	Day 2	Day 3	Day 4	Day 5
09:00 - 10:30	English language lesson	English language lesson	English language lesson	English language lesson	English language lesson
15 minute break					
10:45 - 12:15	English language lesson	English language lesson	English language lesson	English language lesson	English language lesson
5 minute break					
12:20 - 14:20	AI module	AI module	AI module	AI module	AI module
Week 2					
Follows same schedule as week 1					

Course topics:

Reading skills

Exposure to and practice of main types of reading techniques to gain deeper understanding and focus attention on linguistic, semantic and surface details.

Writing skills

Formal and informal writing practice to develop fluency and understanding of register. Look at fundamentals of accuracy, cohesion and coherence. Writing activities may be set for homework.

Listening skills

Provision of a variety of listening activities to help students develop effective listening strategies for global comprehension and intensive listening.

Speaking skills

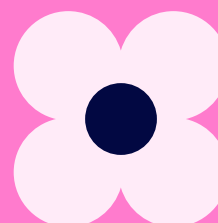

A range of activities to encourage communication is key in our teaching, to improve accuracy and fluency in authentic contexts.

Vocabulary

Vocabulary represents one of the most important skills necessary in learning a foreign language. Our lexical approach encourages the linking of words, chunks formed by collocations and fixed phrases.

AI - Module

Participants will be introduced to practical and accessible uses of Artificial Intelligence in daily life and education. Learn to create simple quizzes, worksheets, and lesson plans using AI tools, interact with AI chatbots like ChatGPT to practice English and explore everyday applications such as translation apps, recommendation systems, and voice assistants (Siri, Alexa, Google Translate).

Outcomes

Gain a deeper understanding of English language skills: reading, writing, listening, speaking, mediation, fluency, and accuracy, integrated with practical AI use

Feel more confident in using English for professional and international contexts

Explore the practical use of AI in daily life, work and education

Benefit from social networking and exchange of best practices with international colleagues

Establish professional cooperation and links

Gain insights into other European systems of education

Discover Erasmus+ potential for professional development

**If your Erasmus+ National Agency has additional requirements not covered in our advertised course offers, please contact us and we would be pleased to design your course to meet these requirements.*
