### All Steel Welded Wire Tenant Storage Lockers

WireCrafters welded mesh locker construction is strong and secure, and gives installers more flexibility to custom fit and professionally finish storage areas, while eliminating clutter and efficiently utilizing available space. Most condominium buildings can recoup the project cost in under twelve months by renting storage lockers to tenants at typical rates.

WireCrafters tenant storage lockers are made of 10 gauge wire in a 2" x 2" square welded wire mesh. This mesh is welded into a 1 1/4" x 1 1/4" x 13 gauge rolled formed angle. The storage locker's open but secure design allows existing lighting, ventilation, and fire suppression systems to function effectively throughout the secured storage areas.

### Features

- Welded mesh allows field modifications for unforeseen obstructions
- Two basic styles, single or double tier
- Stock sizes: 7'-6" tall, 3' or 4' wide, 3', 4', or 5' deep
- Non-stock sizes available
- Pad lock lugs, with door strikes standard
- Three point lock
- Constructed of industrial grade materials
- May be used individually or in a group
- Styles may be mixed within a group
- Easy installation
- Free Layout service
