

GENERATOR ACCESS SOLUTIONS FOR MEDICAL FACILITIES

AVOID FINANCIAL LOSSES ASSOCIATED WITH SHUTDOWNS. USE SAFE RELIABLE GENERATOR ACCESS.

ERECTA STEP
A SixAxis Company

- Time is money! Metal stairs that fit your need in a fraction of the time.
- Modular stairs eliminate custom fabrication.
- Prefabricated metal stairs bolt together in a snap.
- No welding, special tools or cranes needed.
- No hot-permits or production line shut-downs.
- Always OSHA compliant stairs
- All durable, lightweight aluminum construction

5 COMPONENTS UNLIMITED CONFIGURATIONS

PLATFORM
36" x 36"

HANDRAIL
42" high

TOWER
1 to 6 steps combine together to reach any height

STAIR

LADDER

Generators can give years of reliable service, but that's typically only possible with regular maintenance.

Performing regular maintenance will ensure your industrial generator will operate reliably, helping your business avoid the financial losses associated with a shutdown.

ErectaStep generator access stairs are prefabricated, modular, solid, safe, and OSHA compliant! ErectaStep access solution makes generator maintenance safe and simple at your data center, pipeline terminal, or distribution center.

ErectaStep's line of industrial modular metal stairs and industrial maintenance access platforms feature modular, lightweight aluminum components that are as easy to reconfigure as they are to assemble.
