MARINA STEP
SAS SERIES

PURPOSEFULLY BUILT, RELIABLY SAFE

Our advanced corrosion-resistant, marine grade aluminum vessel gangways are designed for OSHA compliant worker safety, durability and reliability in marine environments. MarinaStep gangways are built to order to your required length and specifications and they're built to last, too. Constructed of durable aluminum, galvanized or stainless steel, our vessel gangways are available in sizes up to 24' in length and 5' in width. Special-purpose gangways exceeding those measurements can also be built.

SafeRack is committed to workplace safety. This is why we manufacture durable and long-lasting aluminum safety products including marine gangways, dock gangways and custom marine ramps for safe access to and from barges and ships. With a long history of building gangways, our patented ship gangways and ramps are custom designed by our engineering staff to meet your application needs and are built for durable and long-lasting performance in harsh marine conditions.

PRODUCT FEATURES

Heavy-Duty

Aluminum design results in a longer-lasting solution that require less maintenance

Ergonomic Design

Self-adjusting stairs always providing a solid and level walk surface and are oversized for increased comfort and usability.

Expedited Access

Quick order processing, readily available replacement parts and fast delivery

Variety of Sizes

Available in sizes up to 24 feet in length and 5 feet in width. Special-purpose gangways exceeding those measurements can also be built

MARINE GANGWAYS

SELF ADJUSTING STAIR (SAS)

Our barge and ship gangways are built-to-order to your required length and specifications. The SAS model has self-leveling stairs that adjust to the angle at which the gangway has been lowered or raised. This feature provides a walking surface that prevents slips and falls with a familiar stair design. Constructed of durable aluminum, galvanized or stainless steel, they're readily available in lengths up to 24' and up to 5' in width—and vessel gangways exceeding those dimensions can be designed and built if your application requires it. The SAS series has an operational range of 45 degrees up and 40 degrees down.

ADDITIONAL FEATURES

Multiple Wheel Options

Including tilt and roll multi-directional wheels, swivel casters, and fixed wheels

Unmatched Strength

Two (2) oversized 1" diameter solid stainless-steel pivot rods with pivoting bushings at all load bearing pivots for unmatched strength, long life and a more solid walk surface

Smooth, Soft, Buffered Return

Over-travel stops with rubber bumpers provide the gangway with a smooth feel

Lift Options

Raise and lower the gangway via multiple options. You can use an existing crane, or choose from counter-balanced springs, hand-winch operation, pneumatic or hydraulic cylinders, or a pneumatic, hydraulic, or electric winch
