Modular Woven Welded Wire Cages and Panels

Wire cages, security cages, storage cages and partitions can be customized and designed for your commercial and industrial applications. Woven and welded mesh panels are secured inside sturdy angle frames with a wet enamel gray finish for long lasting durability and dependability.

Wire cages provide security in a wide variety of industries and can be built to any size or configuration with our Woven Wire Partition System. Using our wire partition panels, you may construct wire cage walls and ceilings from the same modular sized panels. The partition panels may be stacked to your desired wire cage height, and the panels easily bolt to posts using standard hand tools. A full line of hinged, double hinged, and sliding doors are available for building the wire cage, and the open but secure design allows free circulation of light, HVAC, and fire suppression systems throughout the secured areas.

Features

- Easy installation requires no special tools
- Heavy-duty panels bolt together
- Modular design for endless configurations
- Custom-sized panels and special heights are available
- Multiple door and lock options available
- Many panels and basic cages are in stock for quick 48-hour shipping

WIRECRAFTERS

WIRE CAGE OPTIONS

We manufacture wire cages with woven wire panels, welded wire panels, expanded metal panels, polycarbonate panels, and sheet metal panels. Some tool cribs and security cages require a different mesh than the standard 2" x 1" woven rectangular mesh. Depending on the application, a see-through solid wall may be required for viewing stored equipment, so polycarbonate panels would be used. Some applications use sheet metal panels so no one can see what is inside the secured storage area. WireCrafters can substitute a variety of both woven or welded meshes to meet most any security requirement.

Tool Cribs and Equipment Cages

- Easy installation requires no special tools
- Heavy-duty panels bolt together
- Design accommodates endless configurations

Machine Guard Systems

- Hinged, double hinged, sliding and vertical rise doors available
- Fully framed panel adds strength and stability unequalled in the industry
- Custom size panels available

Driver Cages and Building Access

- Steel support posts are 2" square
- Wall and ceiling panels constructed of 10-gauge wire
- Multiple door and lock options available
