LASTING

PURPOSEFULLY BUILT, RELIABLY SAFE

Our advanced corrosion-resistant, marine grade aluminum vessel gangways are designed for OSHA compliant worker safety, durability and reliability in marine environments. MarinaStep gangways are built to order to your required length and specifications and they're built to last, too. Constructed of durable aluminum, galvanized or stainless steel, our vessel gangways are available in sizes up to 20' in length with custom widths. Special-purpose gangways exceeding those measurements can also be built.

SafeRack is committed to workplace safety. This is why we manufacture durable and long-lasting aluminum safety products including marine gangways, dock gangways and custom marine ramps for safe access to and from barges and ships. With a long history of building gangways, our patented ship gangways and ramps are custom designed by our engineering staff to meet your application needs and are built for durable and long-lasting performance in harsh marine conditions.

PRODUCT FEATURES

Heavy-Duty

Aluminum design results in a longer-lasting solution that require less maintenance

Stronger Design

One piece design reduces welds and failures

Expedited Access

Quick order processing, readily available replacement parts and fast delivery

Variety of Sizes

Available in sizes up to 20' in length and 5' in width. Special-purpose gangways exceeding those measurements can also be built

MARINE GANGWAYS

STAGE STYLE (SG)

Our SG series aluminum gangways for barge and ship access use a rugged U-body construction to provide a live load capacity of 750 pounds and can be custom constructed to accommodate even higher load capacities. Depending on the operating angles needed, you can choose from several walk surface styles to improve your footing when operating at steeper angles. Choose from a flat ramp (diamond tread or our stamped aggressive tread used on self-adjusting stair (SAS) series), add cleats to a flat ramp walk surface to allow up to a 30-degree incline, or choose our custom extruded curved treads to allow up to 45 degrees of operation.

ADDITIONAL FEATURES

Multiple Wheel Options

Choose from Tilt and Roll multi-directional wheels, swivel casters, fixed wheels, or a dock roller as standard. If you have a special application, we can design something to meet your needs

Variety of Walk Surfaces

Flat ramp, stamped aggressive tread, cleats, and extruded curved tread

Configured for Your Application

Can be used in a fixed, mobile, or stand-alone application

Lift Options

If you need your gangway to be fixed and not stand-alone, you can use your own crane, or choose from counter-balanced springs, hand-winch operation, pneumatic or hydraulic cylinders, or a pneumatic, hydraulic, or electric winch

Handrail Design Strength

Our handrails are laser cut from 2" square tube and robotically-welded from continuous pieces to provide structural stability
