

ADA Ramps and Stairs

for modular buildings

Our Work

Our prefabricated, ADA ramps and stairs are all designed with durable, aluminum material. They are engineered specifically for modular buildings in the sense that they can be reconfigured and added onto as the modular moves locations and site conditions change.

Our Service

- Quick project quotation
- Engineering support
- Layout drawings for each project
- Project management
- Professional installation

BIM files and specifications can be found at:

The Upside Features

Code compliance

We manufacture our ramps and stairs to meet ADA and IBC regulations.

Long lasting

Aluminum will never rust, warp, or rot, so it is durable and does not require costly maintenance.

Leveling legs

All platform and ramp legs have a range of adjustability to accommodate uneven ground.

Reconfigurable

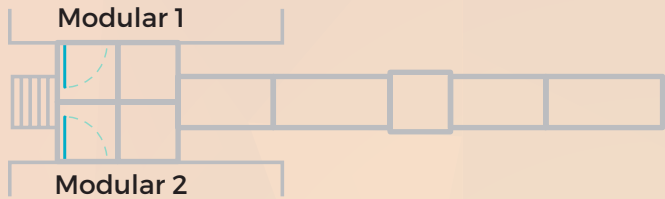

Reuse and reconfigure the ramp and stair system as the modular building moves sites.

Easy installation

All components are pre-welded; simply hook and bolt them together for fast assembly.

RAMP WITH COMMON PLATFORM

MODULAR DESIGN

Combine any of the following components to reach any door threshold height:

RAMP SECTIONS

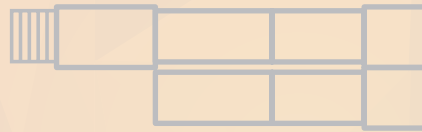

- 4' Section
- 5' Section
- 8' Section
- 10' Section

PLATFORM SIZES

- 64" x 64" Platform
- 64" x 96" Platform
- 72" x 72" Platform

*Other sizes available if required

SWITCHBACK RAMP
