UPSIDE

COMPANY OVERVIEW

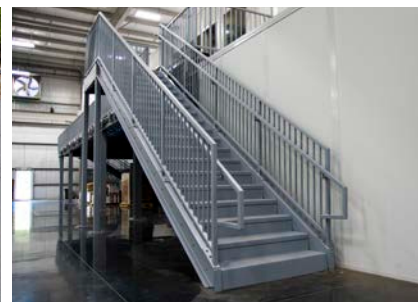

SafeRack LLC was established in 2003 and is located in Andrews, SC. We are a small business of less than 500 employees. In our state-of-the-art facility we engineer, manufacture, deliver and install platforms to meet any project's unique specifications. Using galvanized steel gangways, platforms, safety cages, and fall-prevention railings and gates, we customize for terminal as well as mobile units to maximize safety and performance. We can install and assemble a stand-alone loading system within a matter of hours. Our spill containment systems meet stringent U.S. EPA compliance measures making sure that oil, fuel and any hazardous materials are captured and reclaimed. It also means our pledge to safeguarding the environment is every bit as strong as our commitment to providing the safest, OSHA-approved loading systems possible for today's workforce.

DIFFERENTIATORS

SafeRack elevates safety and productivity with safe, ergonomic fall protection in elevated work areas. Our lightweight, easy-to-maneuver portable access stairs and platforms enable workers safe access to some of the most challenging elevated workspaces like trucks, aircraft, railcars and other vehicles. We are also experts in and carry full lines of swivels, loading arms and spill containment.

CORE COMPETENCIES

- Gangways & Loading Ramps
- Rolling Platforms
- Loading Racks
- Safety Gates and Traffic Control
- Spill Containment
- Loading Arms
- Safety Cages
- Skids
- Shelters and Canopies
- Fall Protection
- Terminal/Specialty

MILITARY BASE USE POSSIBILITIES

MISSION STATEMENT

Behind everything we do, there was first a bold idea. At SafeRack, we like to figure out how to use the latest innovations to make safety products better. For over a decade, we've reimagined how our industry addresses safety and innovation in the workplace, applying new technology to the way we build and the way you buy. As soon as we identify a need in the market, we innovate to fill the gap, consistently keeping industrial companies as safe and productive as possible. SafeRack has revolutionized the buying experience, simplified decision-making and outfitted our customers' facilities with the highest caliber products out there.
