ErectaStep has provided Tailored Solutions for Safe, Easy Access for the chemical industry for years.

Built with corrosion resistant aluminum, our work platforms and metal access systems are perfect for the complex environment associated with a chemical plant. Because ErectaStep is fully prefabricated, and bolts together, it's perfect for situations that limit or prohibit hot-work or welding.

OSHA Regulation Experts – Does your existing chemical safety equipment or chemical loading systems meet OSHA's latest requirements? SafeRack's professional technical sales consultants are available to meet with your team to make recommendations to keep your facility in front of OSHA's ever-changing country and region-specific standards and regulations, including lifeline and trolley beam fall arrest systems, metal stairs, and access platforms. In addition to maintaining OSHA compliance, the bottom line can be impacted when workflow systems aren't streamlined and efficient. SafeRack's innovative technology patented designs and extensive expertise help employers across the globe improve worker safety and productivity.
