ErectaStep Portable Foundation Concrete Form Kits

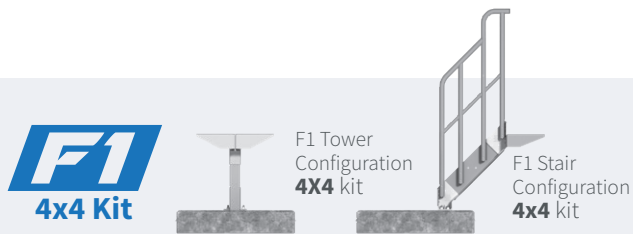

- Form size is engineered to meet OSHA requirements for stair landing and meets structural stability requirements for up to a 6 step ErectaStep system, including towers.
- The F1 supports up to 6-Step ErectaStep structures (or 63"), with the F2 supporting towers up to 57"
- Allows penetrationless (*rooftop installations require bottom plate priced separately*)
- Designs for use with towers, tower/ladders, or stairs
- Flat-packed for shipment
- Easy assembly by hand, requiring 3 basic tools: impact driver, rubber mallet, & pliers
- Includes anchor bolts, hardware and rebar
- Concrete by others
- Design Criteria (*Foundation Only*):
 - Galvanized steel construction
 - **F1** Dimensions 9" height and ~4' square (actual 3'10-3/16" square)
 - Estimated weight after adding concrete ~1800 lbs
 - 50psf live load / 20psf snow load / 105mph wind load (exp. cat. B)
 - **F2** Dimensions 9" height and ~3' width x ~2' length (actual 3' 1/16" x 2' - 4 1/16")
 - Estimated weight after adding concrete ~785 lbs
 - 50psf live load / 20psf snow load / 105mph wind load (exp. cat. B)

Key Features

- 7 components, fast assembly
- Light weight, easily transported by one person
- Stair and tower configurations
- Only use three tools:
 - Impact driver
 - Rubber mallet
 - Pliers
- Top edge is chamfered for additional safety
- Concrete forms are designed not to be removed after concrete is poured
