Designed for Work,
Built for Safety

Mobile Work Platform

The MP Series brings the workspace, stability, and safety of a fixed platform to a fully mobile rolling unit — giving your team professional-grade access wherever the job demands it. Built from lightweight aluminum with powder-coated handrails and OSHA-compliant stair stringers, the MP Series is engineered for serious work without sacrificing ease of movement.

The compact 3x3 MP offers the same trusted performance in a smaller footprint, purpose-built for tight spaces and equipment-side access.

STANDARD 3X3

1' OPTION

2' OPTION

OSHA-compliant design with 9" rise/9" run stairs, full-size handrails, and full toe boards

Punched serrated walk surface for aggressive, extreme-grip traction on platforms and stair treads

Total-lock casters with an ultra-low friction coefficient for effortless mobility and secure lockdown

Standard cantilever kits allow 1' or 2' extensions on any side — bolt-on in the field for equipment with ground-level obstructions

Modular and scalable — units of the same height bolt together to create a longer continuous platform

Optional foam-filled casters for smooth navigation over bar grating or uneven surfaces

500 lb load rating on the main platform/ stair; 300 lb rating on cantilever kits

Durable powder-coated finish built to withstand demanding industrial environments

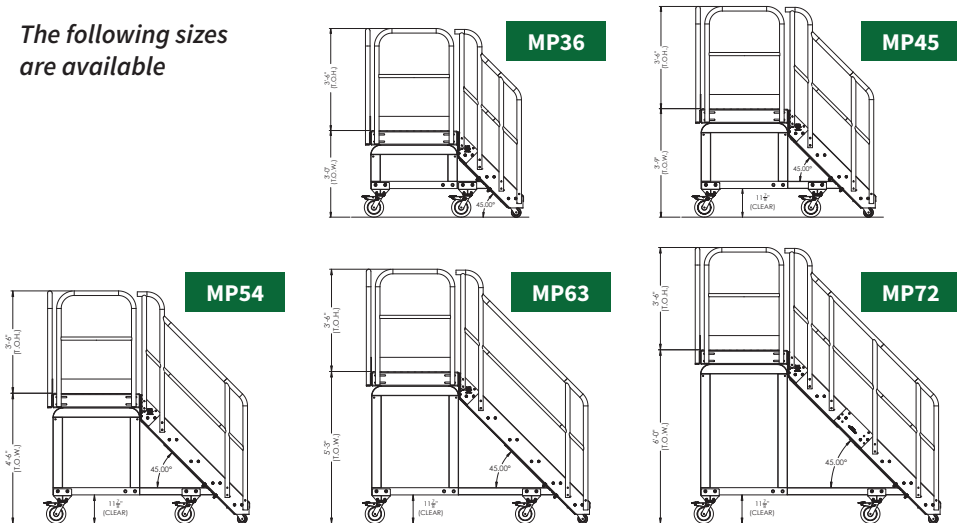

3x3 MP SERIES

Mobile Work Platform

Whether you need a single compact unit or a fully connected platform system, the MP Series adapts to your workspace so you never have to compromise on safety or productivity.

The following sizes are available

Note: 3x3 MP36 shown in the following schematics
