

FORWARD THINKING FROM THE GROUND UP

SixAxis was launched in 2002 by two entrepreneurs who really believed in great customer service combined with great products and disruptive speed to market. Built quite literally from dirt floors up, the company has grown into a sustainable, integrated enterprise of innovative, market-facing brand solutions, all with safety and compliance in mind.

The plan from inception, was to provide superior quality, American-made products and services preferred by employers across many vertical markets to help eliminate the leading cause of injury at work (slips, trips, and falls) while keeping operators safe and efficient and businesses productive and profitable.

We're proud of our innovative products and technology, but the exceptional people behind it are what set us apart. Our

dynamic sales team serves customers worldwide supporting the growth of safer and more efficient workplaces across vertical markets from food & beverage to bulk chemical to aerospace & defense. Our innovative systems compress the time-to-solution ratio with a one-of-a-kind collaborative sales, engineering, and manufacturing process that delivers the safety solutions our customers rely on to keep people safe at work.

At SixAxis, we ensure that our employees, and those of our customers enjoy the safest, most productive, and most compliant work environments. Period.

Our patented products are made in America under the brand families SafeRack, ErectAStep and Upside Innovations.

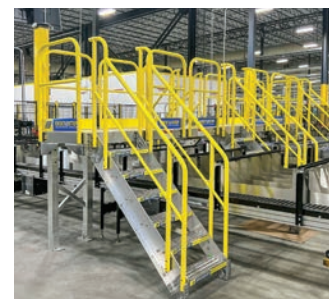

OSHA-Compliant Modular Stairs and Access Systems

ErectaStep addresses the challenges facing the modern industrial workplace and the need for safe, efficient, and unfettered access to ensure success. Through five interchangeable components that provide unlimited configurations, we're helping businesses overcome workplace obstacles with highly durable, OSHA-compliant solutions that, in most cases, eliminate the need for costly and time-consuming engineering and custom fabrication.

Our sturdy, high-grade aluminum stairs, handrails, platforms, tower supports, and ladders are made to precise specifications and can be quickly modified to meet any facility's changing footprint – all with simple bolt and wrench assembly. Extremely versatile, cost-effective, and always in stock for next-day shipping, we're helping businesses rise above their workplace challenges in a matter of hours so they can proceed with the important work at hand.

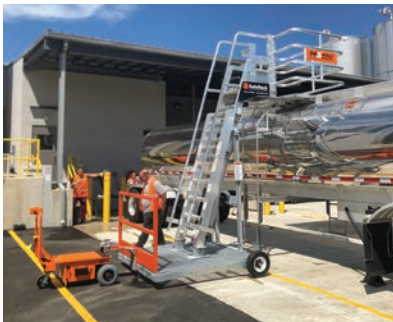

5 COMPONENTS
UNLIMITED CONFIGURATIONS

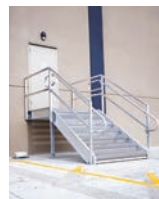

OSHA-Compliant Bulk Loading Safety and Access Solutions

SafeRack delivers elevated loading rack and safety cage solutions to companies that place a premium on worker safety. We engineer, manufacture, supply and install platforms to meet any project's unique specifications. Using galvanized steel gangways, platforms, safety cages, and fall-prevention railings and gates, we customize terminal and mobile units to maximize safety and performance. Importantly, we can install and assemble a stand-alone loading system within hours.

ADA and IBC-Compliant Access Stairs, Ramps and Canopies

Based in Cincinnati, Ohio, Upside Innovations designs, manufactures, and installs ADA and IBC aluminum ramps, step systems, and covered walkways of the highest quality. Customers in the commercial construction and modular construction industries rely on our durable and compliant safe access solutions. Since its founding in 2009, Upside has established itself as an innovative product designer, best-in-class service leader, and superior employer. SixAxis acquired Upside Innovations in May 2021.
