TODO-MATIC® Couplers

Everything You Need to Increase Facility Safety and Efficiency.

Whether you're loading crude oil into railcars, liquid chocolate into heated trucks or even acid into an ISO container, SafeRack offers the tools and expertise that ensures your team is as safe as possible and your system works efficiently and seamlessly.

We offer the latest solutions in loading, fall protection and facility safety, with products like, the TODO dry disconnect, OPW swivels and loading arms, safety cages and partitions from WireCrafters, Bradley Safety showers and eye wash stations, as well as ErectaStep preengineered metal stair and platform systems.

The added value that you receive from SafeRack makes your job easier and provides peace of mind, ensuring your project will be completed on time, on budget and done right.

Features

- **Increased Productivity**
Safer, ergonomically designed systems boost productivity in your truck and railcar loading racks.
- **Better Value**
Every system comes with world-class customer service, advanced technology, quality designs and years of experience.
- **Collaborative Approach**
We coordinate with your team, local engineering and other key stakeholders to provide complete, seamless solutions.
- **Superior Service**
We listen, we ask the right questions and we're on-site and available throughout the entire process.
