

POWER GENERATION ACCESS SOLUTIONS

Power Generation Access Solutions

Durable, Long Lifecycle

100% industrial-grade aluminum.
Won't rust, warp, or rot.

Infinite Configurations

Our modular design and experienced engineers can configure solutions for the most difficult projects.

Reach Any Height

Our team can design generator access stairs to reach any height you need.

OSHA Compliant

All stairs and access platforms meet OSHA codes with an IBC compliant option also available

Upgrade/upfit

Existing commercial standby power generator stairs and platforms systems (made of wood and/or rusted out steel), can now be easily replaced with long-life and low-maintenance aluminum stairs and work platforms.

Fast Installation

Prefabricated and bolts together on-site. No welding needed.

We Install

Make sure your project goes smoothly with our professional team of installers.

CASE STUDY 1

- The client wanted to replace the long-term use of scaffolding with a permanent, OSHA compliant solution for safe access to their GEC Turbines
- They were looking to reduce the cost of scaffolding
- Saferack was chosen and the client was delighted with the outcome
- Safety and productivity working in harmony

CASE STUDY 2

- A leading US distributed energy infrastructure company wanted a modular, compliant solution for safe access into and out of their utility power source, each unit having entry and exit points
- In collaboration, a new solution based around modular design concepts was created and installed
- Simple to install with easy adjustment

AFTER

BEFORE

Safe Alternatives To Scaffolding

There are safe alternatives to scaffolding that are automatically OSHA compliant. Modern modular work platforms are constructed to exacting standards that give users immediate OSHA compliance.

Modular systems are designed to give workers superb fall protection, very stable workspaces, and ease of construction. Mobile work platforms and fixed work platforms are perfect for scheduled maintenance projects, manufacturing environments, and production line crossovers.

In addition, SafeRack can support you with a broad range of associated equipment such as listed below, plus many more:

- RollaStep Mobile Stairs & Work Platforms
- Emergency Drench Showers & Eyewash Stations
- Spill Containment
- Grounding Devices
- YellowGate Safety Gates
