

Pregis

AirSpeed® MINI PAK'R® V3

Multitube

- Multifunctional
- Air Transfer Technology
- RFID Technology

The Multitube is a solution when a variety of applications is required. It allows a high quality protection thanks to the air-transfer technology, which improve shock absorption. Each air cushion is composed of 8 rectangular shaped pouches which offer a higher flexibility of protection.

- Size cushion: WxL = 400x130 mm
- Thickness: 19 micron
- Material: LDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4079605

Machine & Accessories

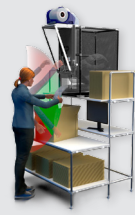

The **MINI PAK'R V3** is a compact and versatile machine producing air cushion on-demand. Compatible with Integrated Systems and a large range of accessories, the machine is the right solution for warehouses and distribution centers with multiple packing tables. Using RFID, the film settings are automatically selected, which make the machine easy to use.
