

Pregis

Performance Flexibles

Collation Shrink Film Solutions

Pregis is a forward-looking protective packaging company focused on sustainability, innovation, and customer experience. **Pregis Performance Flexibles**, a division of Pregis, extrudes polyethylene-based general, high performance and barrier films.

Our collation shrink film effectively bundles cans and bottles for secure transport, offering optimal toughness, cuttability, and consistent COF for minimal movement and easy handling.

Logistical Collation Shrink

Features

- Unprinted co-extruded polyethylene shrink film with excellent shrink and sealing properties
- Runs efficiently on high-speed bundlers
- Cost competitive general-purpose solution for a diverse range of bundling applications

Typical Applications

- Palletized goods transport to point-of-sale
- Bottles and canned goods

Sustainability

Features

- Engineered performance using less raw materials
 - Ability to downgauge material while maintaining performance
- Focused on recyclability
 - How2Recycle pre-approved films
- Optimizing recycled content
 - Offering up to 50% post-consumer recycled content

Collation Shrink Solutions

Pregis Performance Flexibles collation shrink film is designed for high-speed and demanding mass bundling applications.

Our film formulations are engineered for:

Toughness

Broad Processing Window

Cuttability

Consistent COF

Specifications:

Gauge: 1.25 – 2.5 mil

Core Diameter: 3" and 6"

Width: Capabilities up to 106"
