Complete Portfolio of Solutions

In transit or on the production floor, we **solve your toughest business challenges** with our innovative packaging and protective solutions. We have what you need to create customers for life.

Inside the Box Protection

Mailing & Bagging Solutions

Surface Protection

Industry Solutions

Pregis Innovation Headquarters (IQ)

Pregis IQ® helps customers optimize packaging performance through data-driven design, testing, analysis and training. Using a consultative approach, IQ experts evaluate packaging processes and recommend solutions that improve protection, operational efficiency, sustainability and total cost of ownership.

- **Reduce costly damages**
- **Increase fulfillment rates**
- **Achieve sustainability goals**
- **Improve transportation efficiencies**
- **Optimize material usage**
- **Enhance customer experience**

Inflatable Systems

Cushioning System

Ascent™

Pregis AirSpeed® Ascent™ high-pressure air cushioning system produces Hybrid Cushioning (HC) films for the highest level of product protection.

- Patented seal technology offers superior inflation and consistent cushioning
- Built with operators in mind – no exposed parts, ergonomic and user-friendly
- Smart Logic identifies film and optimizes system settings
- Up to 100 feet per minute of throughput for high-volume operations, enhancing productivity

Hybrid Cushioning (HC)

Choose superior product protection with Pregis AirSpeed® Hybrid Cushioning (HC). The unique square pattern of this high-pressure cushioning solution increases shock absorption during transit, while its premium aesthetic enhances the unboxing experience. All HC films are designated as Store Drop-off recyclable by How2Recycle®.

- **HC Barrier:** Highest level of durability, air retention and cushioning
- **HC Inspyre:** 1% of sales donated to help fight water insecurity
- **HC Renew™ PCR:** Made with a minimum of 80% post-consumer recycled content to advance sustainability goals
- **HC Renew™:** Made with a minimum of 30% recycled content
- **HC Renew™ Ultra:** High-yield film for lighter products, made with a minimum of 30% recycled content

HC Inspyre™

HC Inspyre inflatable film delivers the same product protection with added purpose. One percent of Inspyre product sales supports the Uzima Clean Water Mission, helping provide vulnerable communities with access to clean water.

Inflatable Systems

Custom Cushioning System

ChamberPak®

Pregis AirSpeed® ChamberPak® provides a series of adjoining tubes securely inflated to cushion and protect products during shipment.

- Patented one-way valves keep chambers inflated even if one is punctured
- Perfect for extended ship cycles and puncture resistance
- Stock and custom designs available to meet unique needs

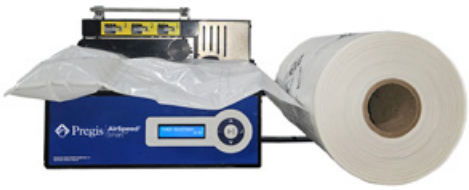

Void-Fill and Light Cushioning Systems

Smart®

The Pregis AirSpeed® Smart® is a compact, lightweight, durable system ideal for workstations and small spaces.

- Engineered for durability and low maintenance
- Integrates with Smart accessories for enhanced productivity and ergonomics
- Dispenses standard air pillows and double cushion void-fill solutions
- Offerings include Pregis Renew™ PCR Double Cushion made with a minimum of 80% post-consumer recycled content

Mini Pak'R® Industrial

The Pregis AirSpeed® Mini Pak'R® Industrial uniquely produces double cushion and quilt film in one system for void fill, wrapping and light cushioning protection.

- Smart Logic identifies film and optimizes system settings
- Offerings include AirSpeed® Renew™ PCR Quilt made with a minimum of 80% post-consumer recycled content

Film Patterns

- **Air Pillows:** Air pillows are an economical and non-abrasive on-demand void fill solution.
- **Double Cushion:** Fits into tight spaces, providing flexible void fill for top, side and corner protection.
- **Quilt:** Low-profile, moldable packaging for wrapping and light cushioning.

Paper Systems

Cushioning System

PackMaster™ Pro

Pregis EasyPack® PackMaster™ Pro cushioning system produces lightweight, durable paper cushions and coils. Easily molded and wrapped around products, PackMaster cushioning provides maximum protection for delicate items to heavy industrial goods.

- Load and go in under 30 seconds!
- Single and multi-ply paper options
- Internal-cutting mechanism with safety lockouts
- Program three pre-set lengths/quantities
- Horizontal or custom configuration
- Compatible with Maxwell® Intelligent Interface for greater system controls

Light Cushioning Systems

Strata

Pregis EasyPack® Strata is a compact, high-speed system that produces structured paper pads for enhanced void fill and light cushioning applications, with the capacity to provide full cushioning. With speeds up to 60 inches per second, Strata boosts productivity while meeting curbside recyclability expectations.

- Dispenses up to 60 inches per second for high throughput
- Structured pads fill space efficiently, reducing material use
- Tailor protection by selecting basis weight and single or multi-ply paper

GeoTerra®

Pregis EasyPack® GeoTerra® paper-based wrappable packaging provides light cushioning and interleaving protection. It is ideal for brands seeking to safeguard products with a curbside recyclable solution where recycling systems exist. Available in manual and automatic dispensers to fit various packaging needs.

- Convenient curbside recyclability where recycling systems exist
- Nests together locking products in place without tape
- Compact dispensers maximize workspace efficiency
- Available in white for brands seeking clean, modern packaging

Pregis EasyPack® PackMaster™ and Strata systems dispense paper made from 100% recycled content, including Forest Stewardship Council® certified recycled paper options.

Paper Systems

Void-Fill Systems

Quantum™ Series

Pregis EasyPack® Quantum™ void-fill systems combine exceptional safety, reliability and enhanced ergonomics to increase productivity. Bladeless-tear technology ensures operator safety, while the patented floating head virtually eliminates jams for smooth operation.

- Virtually jam-free, maximizing uptime
- Intuitive interface simplifies training
- Load and go in under 30 seconds!
- No blades or exposed parts keep packers safe
- Programmable presets dispense paper at specified lengths
- Offerings include FSC® certified recycled paper

Bantam™

The Pregis EasyPack® Bantam™ void-fill system offers simplicity and efficiency with a streamlined design and precise paper-cutting mechanism to optimize the packaging process. Ideal for low- to mid-volume workstations, it can seamlessly scale for high-demand fulfillment environments.

- Simple, user-friendly design ensures minimal training
- Compact footprint conserves valuable workspace
- Adjustable head allows for quick reorientation and effortless loading
- Offerings include FSC® certified recycled paper

Inspyre™ Paper

Pregis EasyPack® Inspyre™ paper is a void-fill solution that allows brands to connect with customers while making a global impact. As part of 1% for the Planet, 1% of Inspyre sales support the Uzima Clean Water Mission, a non-profit providing life-saving clean water filters to combat water insecurity in communities worldwide.

Foam-in-Place Systems

Cushioning and Block and Brace Systems

SmartBagger™

The Pregis IntelliPack® SmartBagger™ system delivers exceptional product protection for high-volume, medium-to-large applications requiring cushioning or blocking and bracing. Equipped with the Maxwell® Intelligent Interface, this intuitive system enables extensive customization and operational efficiencies.

- Virtually unlimited barcode and preset bag options
- Tracks consumption and performance metrics
- Cellular telemetry constantly monitors system parameters
- Open design makes film loading quick, simple and safe
- Easy-to-replace sealing wires and edge seal arbors

Maxwell® Intelligent Interface Web App

Streamline your packaging operations with the Maxwell® Intelligent Interface Web App. Accessible from any browser, this powerful tool lets you easily create, manage and sync packaging instructions across your Pregis IntelliPack® SmartBagger™ systems.

- Standardize packaging processes across your operation from one platform
- Easily upload and sync images and videos
- Reduce errors and enhance operator performance
- Remotely monitor and adjust system performance

SmartShot™

Pregis IntelliPack® SmartShot™ hand-held dispenser is designed for the versatility of packing low-volume or odd-shaped items. For increased flexibility, add the table stand to toggle between producing on-demand foam bags and handheld dispensing.

- Tapered dispenser easily fills narrow or odd-sized spaces
- Heated dispenser minimizes cold-shots
- Insulated handle stays cool
- Table stand option for handheld and bagging in one machine
- Built for durability and reliability

Foam-in-Place Systems

Accessories and Consumables

SmartMold™

Pregis IntelliPack® SmartMold™ is a pre-fabricated custom foam solution designed for repeat, high-volume pack outs of fragile, heavy and high-value products.

- Engineered to exact dimensions for repeatable, uniform protection
- Reduces variability and delivers predictable cost per pack

SmartFoam™ Liquid Foam

Only Pregis IntelliPack® A and B liquids are stored in transparent containers, enabling easy monitoring of liquid levels in drums or totes for improved inventory management. Available in various densities to provide the optimal protection for your shipping needs.

SmartFill™ Tote-on-Tote Auto Replenish System

Pregis IntelliPack® SmartFill™ auto replenishment tote-on-tote system is designed to maximize uptime and ensure operational safety. Reduce manual intervention and seamlessly feed remote equipment for a more streamlined packaging process.

- Easy, efficient changeouts without halting operations
- Seamless integration into various facility layouts
- Robust safety features for enhanced protection

Pregis Inspyre™ Film

Choosing Pregis IntelliPack® Inspyre film ensures premium product protection and makes a meaningful global impact. As part of 1% for the Planet®, 1% of Inspyre sales support the Uzima Clean Water Mission, a non-profit providing life-saving clean water filters to combat water insecurity in communities worldwide.

Ready-to-Pack Mailers

EverTec Mailing Solutions

The EverTec mailer portfolio is built to deliver curbside recyclability where recycling systems exist, exceptional durability and an elevated customer experience to meet the demands of modern fulfillment operations.

EverTec Cushioned Mailers

- Curbside recyclable, double-walled kraft paper construction with proprietary cushioning
- 5 available sizes with stock and custom print options
- Bears Sustainable Forestry® (SFI) 'Certified Sourcing' designation denoting responsible origins of paper material
- Ideal for semi- to less fragile applications including beauty, wellness and home goods

EverTec Non-Cushioned Mailers

- Curbside recyclable, double-walled kraft paper construction with reinforced sealing
- Available in bottom gusset and wicket-ready varieties
- Bears Sustainable Forestry® (SFI) 'Certified Sourcing' designation denoting responsible origins of paper material
- Ideal for non-fragile applications, such as apparel, linens and pre-packaged goods

Pregis Inspyre™ Mailers

Choosing stock Pregis EverTec™ mailers ensures an elevated customer experience and makes a meaningful global impact. As part of 1% for the Planet®, 1% of Inspyre sales support the Uzima Clean Water Mission, a non-profit providing life-saving clean water filters to combat water insecurity in communities worldwide.

Cohesive Solutions

Cohesive Packaging Materials

Cohesive packaging materials provide a fast, efficient way to wrap and secure a wide range of products. Available in paper and poly formats, they bond only to themselves, never the packaged item, creating a secure package without adhesives, tape or heat. Designed for both manual and automated applications, cohesive materials help streamline operations while delivering reliable product protection.

Single Face Corrugated

- Padding, protection and rigidity
- Available in various flute types and paper grades

Film

- Secure, puncture and weather resistant
- Available in wide range of cohesive films

Paper, Linerboard and Poly-Paper

- Rigid, versatile and recyclable
- Cohesive Paper: economical, durable products
- Cohesive Linerboard: high rigidity, corner and surface protection
- Cohesive Poly-Paper: weather resistant, premium aesthetic

Bubble and Foam Substrates

- For added flexibility and cushioning
- Cohesive Bubble: high-performance cushioning and protection
- Cohesive Foam: lightweight, flexible cushioning

Automated Mailing & Bagging Solutions

Pregis Sharp® Automated Bagging Systems deliver up to 4x the output of manual packing, helping operations increase productivity while lowering total operating costs. Designed for high-volume fulfillment environments, Sharp baggers are engineered for efficiency, delivering ROI in nine months or less on average.

Sharp SX

The SX offers a simple, scalable path to automated packing, delivering reliable performance in a compact, all-electric design. This tabletop system is designed for portable, plug & play operation.

- All-electric, mobile small footprint design
- Simple set up, user-friendly operation for quick packer adoption
- 11” max bag width compatibility
- Ideal for both inbound and outbound ecommerce applications, small parts kitting and retail bagging

Sharp Max Series

- High-speed bagging reaching 12+ bags/minute, application dependent
- Designed to integrate into complex bagging workflows
- Built-in Zebra printer and WMS connectivity
- 12" and 20" max bag width models
- Ideal for pharmaceutical, ecommerce, medical and industrial bagging applications

Automated Mailing & Bagging Solutions

Sharp Lynx 18

The Lynx 18 provides maximum fulfillment output without constraints. Designed with a compact footprint and all-electric power, this system brings the possibility of high-volume, full-size mailer fulfillment to spaces traditional bagging could not support.

- All-electric, cart top compact design
- Paper and poly material compatibility
- 18” Full size mailer compatibility
- Left or right exit conveyance available
- Ideal for unique or space-constrained layouts, such as ship-from-store operations and 3PL workflows

Sharp MaxPro Series

Purpose-built for high-volume ecommerce fulfillment handling larger or bulkier items, the MaxPro series delivers material neutral bagging in an operator-friendly build to deliver maximum throughput.

- Inherently safe operation with toolless job changeovers
- Paper and poly material compatibility
- 18” and 24” max mailer width models
- Front and rear conveyance available
- Ideal for large or bulkier product applications, such as puffy apparel, boot boxes and oversized home goods

Pre-Opened Automated Mailers & Bags

Pregis offers a broad portfolio of automated consumables in a variety of materials and gauges to support diverse fulfillment requirements. Available with custom sizing, printing and specialized features, these high-quality solutions are designed to help operations achieve the right balance of performance, efficiency and brand impact.

Automated Mailers & Bags

EverTec Automated Mailers

- Kraft paper construction, curbside recyclable where recycling systems exist
- Heat-activated sealing
- 1-Color custom branding available
- Designed for use with Sharp ecommerce bagging systems

Poly Lite® Mailers

- Minimum of 30% recycled content
- Designated Store Drop-off recyclable through How2Recycle
- Stock and custom sizing available

Poly Lite® Multipurpose Bags

- Designated store drop-off recyclable
- A variety of film blends available, such as General Purpose, Anti-Stat and VCI
- A variety of special features available, such as vent holes, hang holes and retail headers

Pregis Inspyre™ Mailers

Choosing stock **Pregis Poly Lite® PCR Inspyre™ mailers** ensures an elevated customer experience and makes a meaningful global impact. As part of 1% for the Planet®, 1% of Inspyre sales support the Uzima Clean Water Mission, a non-profit providing life-saving clean water filters to combat water insecurity in communities worldwide.

Rightsized Mailing Systems

On-Demand Rightsized Mailing

Pregis Sharp InfinX delivers flexible fulfillment with on-demand rightsized mailing that eliminates excess material and drives overall packaging efficiency. Engineered to fit into your unique operational workflow, InfinX amplifies output while reducing total cost of operational ownership.

Sharp InfinX

- Scans products, forms a rightsized mailer, seals and labels
- Compatible with Pregis paper, poly and bubble materials
- Ergonomic, easy-to-use operation for shift-long packing
- Compact footprint allows for integration into existing or new workflows
- Ideal for multi-SKU product mix applications

Automated Ready Rolls

Designed with the same high-quality and sustainable attributes our Pregis EverTec® and Poly Lite® mailer products are known for, Pregis Automated Ready Rolls allow you to create rightsized mailers tailored to your unique mix of products.

Poly Lite® Non-Cushioned Automated Ready Roll

- White-grey film with high-puncture resistance
- Designated store drop-off recyclable through How2Recycle®
- A variety of roll widths available

Poly Lite® Cushioned Automated Ready Roll

- Low-gloss, white-capped bubble film
- High-puncture resistance and performance sealability
- A variety of roll sizes, cushioning levels and bubble cell heights available

EverTec Non-Cushioned Automated Ready Roll

- Curbside recyclable kraft paper construction
- A variety of roll widths available

Foam Rolls & Pouches

Polyethylene Foam

Pregis Astro-Foam® polyethylene foam is an easy-to-use protective packaging solution that can be used in a wide range of industries and applications.

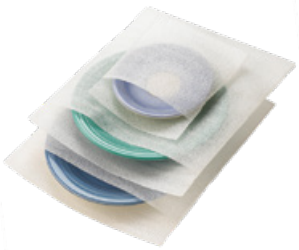

- Tear resistant protection for items with sharp edges
- High cushioning and compression strength minimize shock and vibration during transit
- Non-abrasive material protects the integrity of the surface

Dispenser Pack

- Convenient, mobile cartons and perforated rolls
- Roll widths: 12" or 24"
- Perforation: 12"

Converted and Laminated

- **Pouches:** available in 1/8” foam, standard or custom pouch sizes
- **Laminated:** foam with film protects against tears and punctures. Available in rolls or oversized bags
- **Woven PE Laminate:** maximum cushioning with enhanced puncture/abrasion protection
- **Other capabilities:** adhesive, cohesive, kraft paper

Specialty Foam Products

Pregis specialty foam products are made from Low-Density Polyethylene (LDPE) and can be recycled through LDPE recycling systems. They are designed to be recycled alongside other flexible LDPE materials.

ProFlex® Profiles

- Able to conform to nearly any product contour
- Excellent resiliency, flexibility and shape memory
- Maximum shock absorption and vibration damping
- Cushioning, blocking and bracing

Corner Keeper® Protectors

- ProFlex profiles pre-cut to Corner Keeper protectors save time and labor
- Pull apart easily for minimal labor and inventory

Fabricated Foam

The Pregis PolyPlank® family of products is available in standard and custom lengths. Widths range from 24" to 48", with thicknesses ranging from ½" to 10" and densities from 1 to 9 pounds per cubic foot.

PolyPlank® EXT Engineered Foam Plank

- Produced via an extrusion process which creates a uniform foam with excellent dimensional stability
- Cushions against repeated impacts and can be engineered with anticipated performance

Kase™ Foam

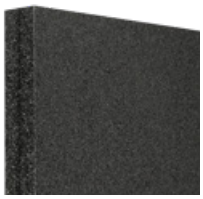

- Closed cell polyethylene foam for high-end, reusable storage and shipping cases
- Higher cell count significantly improves aesthetics and structural integrity, especially for designs with thin wall sections

SFT Foam

- Specially formulated to provide a "softer" polymer to reduce abrasion protecting "Class A" surfaces
- Unique foam die cuts and slices more easily than cross-linked foams and is generally more economical

LEL Foam

- Contains less than 10% LEL VOC meeting military and other low residual blowing agent specifications

PolyPlank® LAM Engineered Foam Plank

- Extruded in varying thicknesses and laminated together for custom thickness or properties
- Laminated foam provides maximum cushioning, excellent dimensional stability and an economical foam plank

MDL™ Foam

- Multi-density patented design combines a thin-gauge, high-density PE top-skin with a high-performance, low-density PE foam base for a uniquely designed custom solution

PolyPlank Renew® Foam

- Made with a minimum of 60% post-industrial recycled content

PolyPlank Renew® XL Foam

- Contains 98% pre-consumer recycled polyethylene certified by SCS Global Services
- Delivers cushioning, dimensional stability, shock and vibration protection

Specialty Products

Paper Products

CushionPak® Recycled Paper Cushioning

- Made from multiple layers of 100% recycled tissue paper sheets
- Ideal for surface protection, cushioning and void-fill
- Efficient design uses embossed or edge-line technique to secure tissue paper sheets together

Single Face Corrugated

- A, B, E, Wave and Jumbo Flute types available
- Various paper types, colors and weights available
- Standard or custom converted options available (widths and lengths)
- 3-color printing and solid colors (flood printed colors) available

Ready-to-Use Paper

Durable, flexible and curbside recyclable, our ready-to-use paper range is designed to meet a wide range of packaging applications. Available in recycled kraft, virgin kraft, newsprint, bogus and tissue grades, these papers can be supplied in various sizes and converted through slitting, coating, embossing and printing

Void Fill Paper Packaging

- Protection from void fill to wrapping
- Available in a variety of paper grades, sheets and rolls
- Ideal for industrial, packaging and shipping applications

Surface Protection Paper

- Protection that stands up to the toughest industries including construction, industrial tools, steel applications, automotive, marine and aerospace

Grocery and Foodservice Paper

- Food service papers found in every restaurant, grocery store, butcher shop, bakery and your favorite deli

Specialty Products

Furniture Protection

Centerfold Laminations

- **Furniture Guard® PE Foam Laminate:** Cost-effective, strong and resilient cushioning with superior protection for packaging, moving and storage applications
- **Furniture Guard Plus® Foam/Film Laminate:** Virtually tear-proof protection for applications ranging from shrink-wrap to standalone systems
- **Third-Web Bubble Laminate:** Added material strength with excellent surface protection, visibility and resistance to tears and punctures

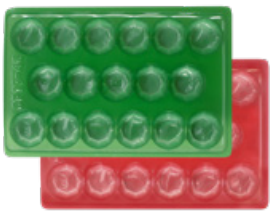

Automotive Protection

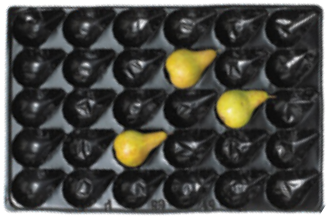

Bumper Guard

- **Astro-Bubble®/Film Laminate:** cost-effective, strength and durability and light cushioning
- **Astro-Foam®/Woven PE Laminate:** maximum cushioning with enhanced puncture/abrasion protection
- Available in wrap and bag forms

Trays

Panta-Pak Trays

Industrial applications:

- Thermoformed from high-strength film; molded cup shapes hold items in a secure package
- These molded trays require no tray set-up like cardboard trays
- The plastic tray is durable enough for reuse and return packing

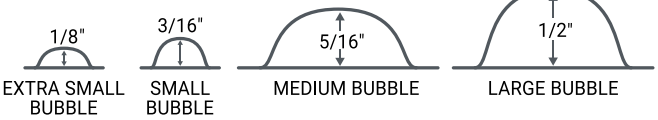

Fruit/produce applications:

- Trays help immobilize produce from peaches and pears to tomatoes
- As an ideal produce merchandiser, the color varieties enhance the visual appeal of produce
- Available in a wide range of shapes, sizes and colors

Bubble Rolls & Pouches

Pregis offers a full line of strong, flexible and lightweight bubble cushioning products to meet all of your protective packaging needs.

Bubble Sizes

Light Duty
Economical protection for lighter weight products with short shipping and storage cycles

Medium Duty
Industrial strength bubble for intermediate storage cycles (less than 30 days)

Heavy Duty
Fragile or heavy products that have extended storage and shipping cycles

Astro-Bubble® Renew™

- Made with minimum 30% post-industrial recycled content
- Light green color
- Designated as Store Drop-off recyclable through How2Recycle®

Anti-Static Bubble

- Static dissipative properties. Perfect for electronics
- Light pink color

Bubble-Out Bags

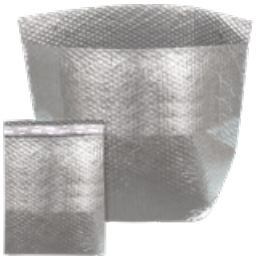

- Lightweight and perfect for packing individual items
- Self-seal closure
- Available in 3/16" bubble, standard or custom sizes
- EZ Bubble-Out® bags on a roll dispense at the point-of-use for increased productivity

Dispenser Pack

- Convenient, mobile cartons and perforated rolls
- Roll widths: 12" or 24"
- Perforation: 12"

Insulated Packaging

- Innovative, metalized all-polyethylene structure certified for store drop-off recycling within the NexTrex® collection network
- Made with minimum 30% post-industrial recycled content
- Ideal for cold chain applications: grocery and meal kits, meats, baked goods and cosmetics
- Available in 2D pouches and 3D flexible box liners

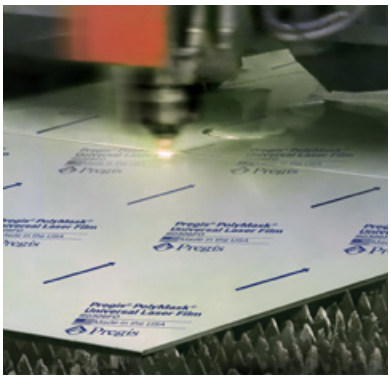

Converted and Laminated

- **Adhesive:** sticks directly to the product. Peels off easily without leaving a residue
- **Cohesive:** sticks to itself, not the product. Leaves no residue behind. Also available in a convenient dispenser carton, with or without perforations
- **Third Web:** bubble with a layer of film laminated to provide extra protection against tears and punctures. Available in rolls or over-size bags
- **Film Laminate:** cost-effective, strength and durability and light cushioning
- **Other substrates:** kraft paper, films or foil

Temporary Protective Films

Pregis PolyMask® temporary protective films cover every major market and application requiring surface protection – from stages of manufacturing through shipping and final assembly.

Temporary Protective Films

- Pressure-sensitive adhesive coated film (i.e., surface protection film, protective tape, protective masking)
- Protects during various stages of processing and environmental conditions
- Adheres to the surface, stays adhered and removes cleanly when the job is done
- Films can be applied to the surface by hand or through machine lamination

Protective film solutions for virtually any surface and market.

Automotive

Offering surface protection for a wide variety of interior and exterior surfaces for automotive, maritime and other transportation applications. Our films protect during assembly, storage and shipping to the final point-of-sale.

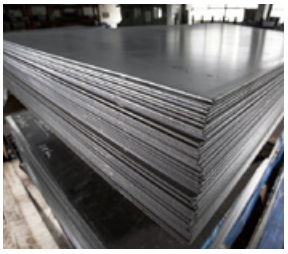

Metals

Our films are designed to protect during processing and are optimized for a range of metal surfaces including steel, aluminum, pre-painted and pre-coated sheets and uncoated and corrugated sheets.

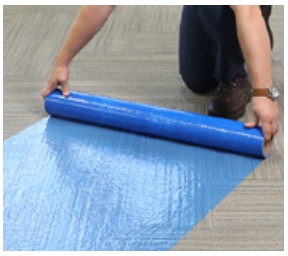

Building & Construction

Adhesive coated films safeguard both the job site and critical materials during transport and installation – from carpeting, countertops, windows, doors and sandwich panels to high-traffic areas.

Appliances

We offer films with tailored adhesion levels that ensure appliances remain free from marring, scratching and abrasion. Films are formulated for stainless steel, aluminum, plastic, polypropylene and polystyrene appliance surfaces.

Flexible Packaging Solutions

A consultative partner in flexible packaging, Pregis Performance Flexibles leverages its material expertise to manufacture flexible solutions that are engineered for converters, trusted by brands and thoughtfully designed to deliver today's demands and tomorrow's expectations.

In every partnership, the foundation remains the same:

- **Efficient performance:** Films tailored to your specs—designed to run smoothly, reduce waste and keep costs in check.
- **Reliable quality:** From resin to roll, every film is crafted for consistency and dependable performance.
- **A specialized team:** Dependable lead times, responsive support and blown-film experts who are ready when you need them.
- **Built-in sustainability:** Pregis Performance Flexibles Renew Series film blends and fiber solutions support the circular economy—recycle ready, made with recycled or renewable resins and responsibly sourced.

Purpose & Sustainability

Pregis Inspyre™ Portfolio

Packaging with Purpose.

Pregis Inspyre™ packaging helps brands turn protection into purpose. As a 1% for the Planet brand member, Pregis donates 1% of Inspyre sales to Uzima, providing life-changing water filters for vulnerable communities.

The Uzima water filter eliminates 99.99% of waterborne bacteria and provides up to 10 years of clean water for 6–10 people.

Pregis EverTec® Inspyre Mailers

Poly Lite® PCR Inspyre Mailers

AirSpeed® HC Inspyre

IntelliPack® Inspyre Film

EasyPack® Inspyre Paper

Pregis Renew™ Portfolio

Recycled content without compromise.

Pregis Renew® products help companies reduce virgin material consumption by incorporating recycled content without compromising packaging performance.

Available across multiple packaging formats, Pregis Renew solutions support sustainability initiatives while delivering the protection businesses depend on.

AirSpeed® Renew

Made with a minimum of 30% post-industrial recycled content or 80% post-consumer recycled content.

PolyPlank Renew® Engineered Foam

Made with a minimum of 60% recycled content or 98% pre-consumer recycled polyethylene.

Performance Flexibles Renew Series

Available with pre-qualified recyclability, recycled content or renewable post-consumer recycled content.

Astro-Bubble® Renew

Made with a minimum of 30% recycled content.

Products worth protecting deserve Pregis

We are a leading manufacturer of **innovative packaging solutions** and **protective products**.

We solve our customers' toughest business challenges with packaging so they can create customers for life. We do this by delivering **creative solutions to packaging challenges** and leveraging a material neutral portfolio.
