Benefits

- One single machine can run all **air cushions**.
- **User lockout**: The user can modify only certain settings.
- Designed for **industrial use**.
- **Fast machine**: Produces air cushions up to 21 meters per minute.
- **Radio Frequency Identification (RFID)** ensures the machine will recognise the air cushion type and adjusts the settings automatically.
- **Storage of data**: Overview of the use and consumption of the machine.
- One machine can provide **multiple packing stations** with air cushions.
- Service through sub-assemblies in **less than 15 minutes**.
- **Auto-Index**: Can be used in Auto Dispensing mode: automatically offering the next string of air cushions.

Accessories

Mobile Fill:
Flexible, mobile and ergonomic solution between the packing tables.

Also available

- Bin
- Foot pedal
- Stand

The **MINI ADS** is designed for a reliable and continuous supply of inflated air cushions for different packaging applications. It provides superior flexibility and is the perfect packaging solution for small spaces.

Cutting Device: The Cutting Device is an accessory that can cut produced cushions into separate strings.

Applications

- Void Fill

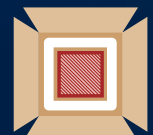

- Cross-layer

- Interleaving

- Block & Brace

- Wrapping
