

Pregis® Protective Films & Coatings

Protecting What Matters

Your customers expect perfection

Customers expect a pristine product to be delivered every time. Pregis PolyMask temporary protective films guard your product's surface from scratches, abrasions and contamination during all stages of manufacturing and shipment. We have the experience to provide you the right protective film solution for virtually any application and help you deliver that perfection to your customer time and time again.

What are temporary protective films?

- Pressure-sensitive adhesive coated film (aka surface protection film, protective tape, protective masking)
- Protects during various stages of processing & environmental conditions
- Adheres to the surface, stays adhered and removes cleanly when the job is done
- Films can be applied to the surface by hand or through machine lamination

Pregis PolyMask protects at every step

Consider a refrigerator, and the delicate components that must be protected throughout each stage of manufacture and delivery.

Service Center

- Polishing
- Buffing
- Protecting

Manufacturing

- Bending
- Forming
- Embossing
