

With Pregis, you get forward-looking packaging solutions, rooted in sustainability, innovation and customer experience.

At the Pregis IQ® which stands for Innovation Headquarters, we deliver tailored end-to-end packaging solutions or a la carte package design and testing services that are backed by real-world data.

Our team of packaging professionals use a consultative approach to deliver solutions that solve business challenges:

Reduce costly damages

Increase fulfillment rates

Achieve sustainability goals

Improve transportation efficiencies

Optimize material usage

Enhance customer experience

We are more than your average testing lab.

Collaborate

Education training & support

Solution-based packaging design

Validate

Industry standard testing

Material testing

Sustainability evaluations

Create

Package development

Proof of concept & prototyping

Integrate

Systems & process planning

Equipment integration services

Semi & full automation

Testing & Analysis:

We validate our solutions in our certified testing lab.

- Distribution testing
- Sustainability testing
- Damage rate analysis
- Material analysis
- Environmental impact
- Thermal testing

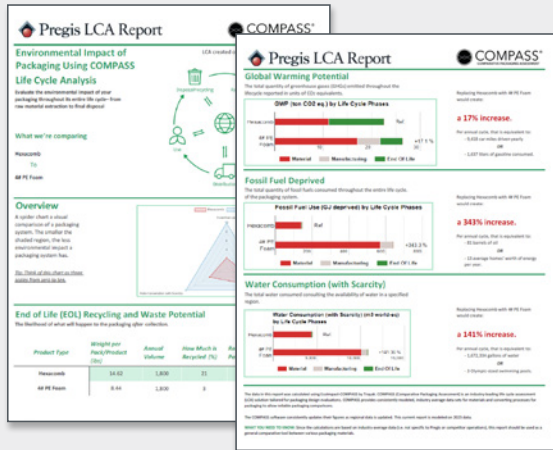

Industry Certifications:

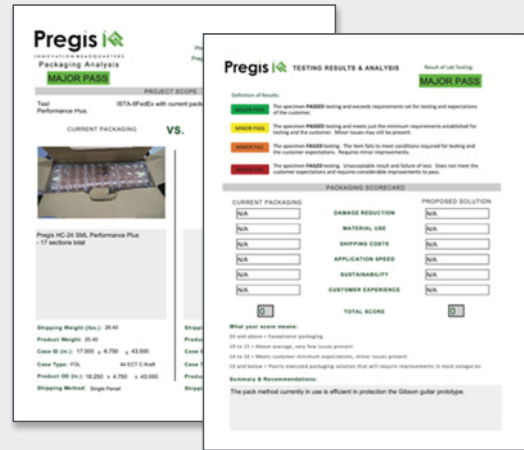

Deliverables:

Our goal is to educate customers and arm them with the data that enables informed decision-making. Each report is custom but may include:

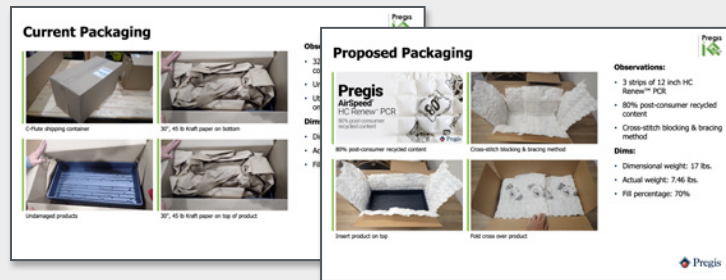

- Material Lifecycle Analysis (LCA)
- EcoGauge Environmental Impact of Damages Assessment
- Cost of Damage Assessment
- Design and Testing Analysis (DTA)
- Dimensional Weight Freight Analysis
- Standard Operating Procedures (SOP)

Example: Material Lifecycle Analysis (LCA)

Example: Design and Testing Analysis (DTA)

Example: SOP Before & After Comparisons

Put our team to work for you!

Our curious and certified engineers are ready to solve your packaging challenge and help enhance your bottom line.
