

## Films PRO PAK'R Pillow Pak LD

- Air-transfer technology
- Widest air cushion in the market
- 100% recyclable

The PILLOW PAK is a wide quilted air cushion. It offers a combination of applications: wrapping, void fill and surface protection.

The width of the film allows the packer to protect and secure the products with a single sheet of air cushion film and with minimal handling activities.

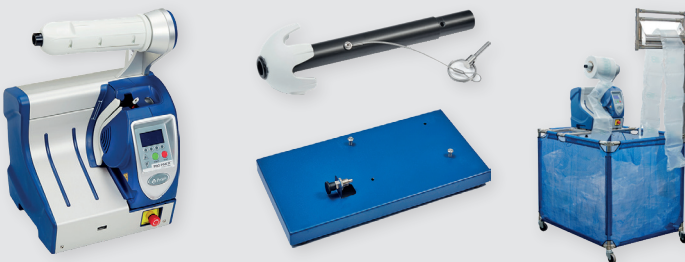

The strong air retention allows a greater shock absorption than regular film.

The PRO PAK'R machine requires a roll holder extension to run the PILLOW PAK film, and a supporting base plate when the machine is placed stand-alone (on a table - not on an accessory).

## Machine & Accessories

The **PRO PAK'R** is equipped with the latest technology. It is fast, smart, easy to use and compact. It works with various films.

## Air Cushion Specifications

- Size cushion: WxL = 705x185 mm
- Thickness: 44 micron
- Material: LDPE
- Rather clear and transparent, green print
- 100% recyclable
- Product code:  
Film: 4078988  
Base Plate: 4079011  
Roll holder: 4079010

## Specifications

### ROLLS

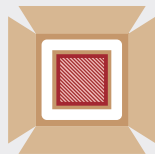

- Roll length: 200 metre
- Roll weight: 11.5 kg
- M<sup>2</sup> per roll: 2.2 m<sup>2</sup>

### PALLET

- Rolls per pallet: 25
- Number of layers: 1
- Rolls per layer: 25
- Pallet weight: 331 kg
- Pallet dimensions: LxWxH in cm= 120x80x90

## Applications

- Wrapping

- Interleaving

- Cross-layer

## Characteristics

### Environmental Friendly

- 100% Recyclable
- Suitable for energy recovery
- Very light, 99% air
- Complies with EN13427 standard for packaging and packaging waste
- Printing is made from water-based ink

### Technical Specifications

- Non toxic
- Groundwater neutral
- Chemically inert
- Dust-free
- Wear-resistant
- Can be transported problem free via the existing recycling systems for PE
- Water repellent

### Storage Conditions

- Store covered in a clean dry room
- Average storage condition should be 20°C (max. 30°C)
- During winter we recommend to store the rolls on site at room temperature at least 24 hours before use
- Keep the rolls out of direct sunlight
- Rolls must be kept at least 2m from any heat source
