

ProFlex®

polyethylene foam profiles

Style Guide

Pregis ProFlex polyethylene profiles provide surface and edge protection to limitless packaging applications. They are easy to use, conform to just about any product contour, and withstand multiple impacts and constant vibration. They feature a chemically inert, odorless, clean, closed-cell structure with excellent resiliency, flexibility and shape memory.

ProFlex profiles are available in an assortment of standard formulations, shapes and colors. They can be manufactured to meet your specific requirements, including fire retardancy, UV inhibition, static dissipation and enhanced malleability.
