Subject: Recyclability Assessment Methodology regarding Extended Producer Responsibility.

Pregis Europe hereby declares that by following the assessment of our AirSpeed and Easypack product lines, based on the official guidance provided by the [UK Government website](#) regarding Extended Producer Responsibility (EPR), we have categorized the products as follows:

- **Easypack Paper Products:** All items within this range are classified as **GREEN**, indicating full compliance with the relevant sustainability and recyclability criteria outlined in the EPR framework.
- **AirSpeed Products:** These have been classified as **AMBER**, suggesting they meet some, but not all, of the criteria for the highest sustainability rating, potentially due to the challenges in collection or processing.

We trust this information provides the clarity you need for your records and planning purposes. Should you require further details or assistance with interpreting these classifications, please contact your Pregis contact.

Yours Sincerely,

Kind regards,

Collin Pustjens
QSH Supervisor
