Benefits

- **Versatile:** This on-demand paper solution can protect all kinds of goods, from lightweight to heavy.
- **Best protection:** The solution offers advanced efficiency and exceptional yield, providing high pack quality and strength for total in-the-box protection.
- **Efficient:** The Packmate™ Pro has a high speed continuous paper output of 23m per minute and produces ultra-strong paper cushions.
- **Easy of use:** Simple controls and easy to load in just a few seconds.
- **Flexible:** The Packmate™ Pro can convert multiple grades of single or twin-ply paper.
- **Eco-friendly:** The machine allows to convert paper up to 60 times its original volume while using minimal material.

Accessories

The **Packstation™** offers a generous workspace that incorporates a paper cushion system conveniently located to save space and deliver the packaging directly at point of use.

Offering flexibility and comfort with multiple options to best suit your requirements.

The **Basket** is lightweight and mobile. Once full, it can be wheeled to point of use and supply several packing areas.

Applications

- Coiling

- Interleaving

- Block & Brace

- Void-fill

- Cross Brace
