Pregis IQ®

INNOVATION HEADQUARTERS

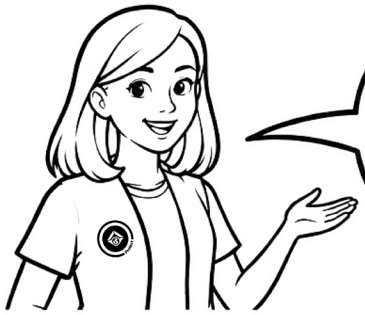

Our first stop is the Pregis IQ where we can discover which packaging material is best for the product!

So the shirt may need something different from a breakable product?

Like this?

Exactly.

Choose the package that gives each product the protection it needs for the trip.

Pregis

A

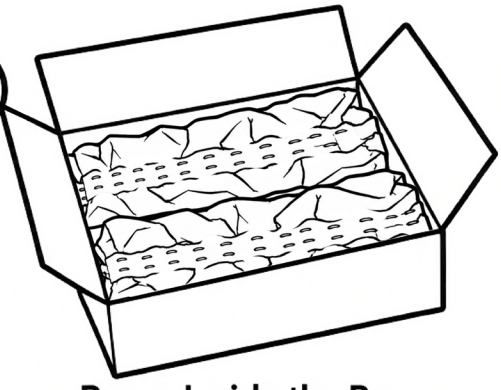

Foam Protection

B

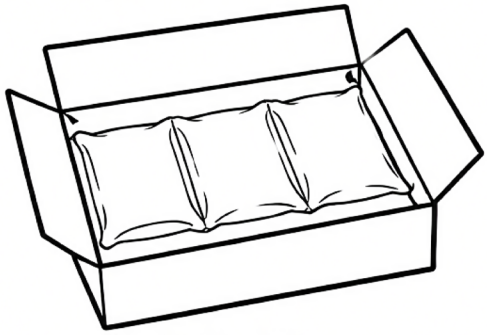

Pregis EverTec Paper Mailer

C

Paper Inside the Box

D

Safe Air Pillows

1-B, 2-C, 3-A, 4-D

Pregis®
Let's not forget we should consider how to make the package as sustainable as possible! We need to think about the material, how much is used and what happens to the package after delivery.
So there is more than one thoughtful choice?
Yes!
PROTECT THE PRODUCT
USE WHAT IS NEEDED
USE THE BEST MATERIAL

Pregis looks at sustainability in four ways. Can you match each packaging example to the right part of the board?

A

Paper that comes from Trees

B

Plastic that can be recycled at the store

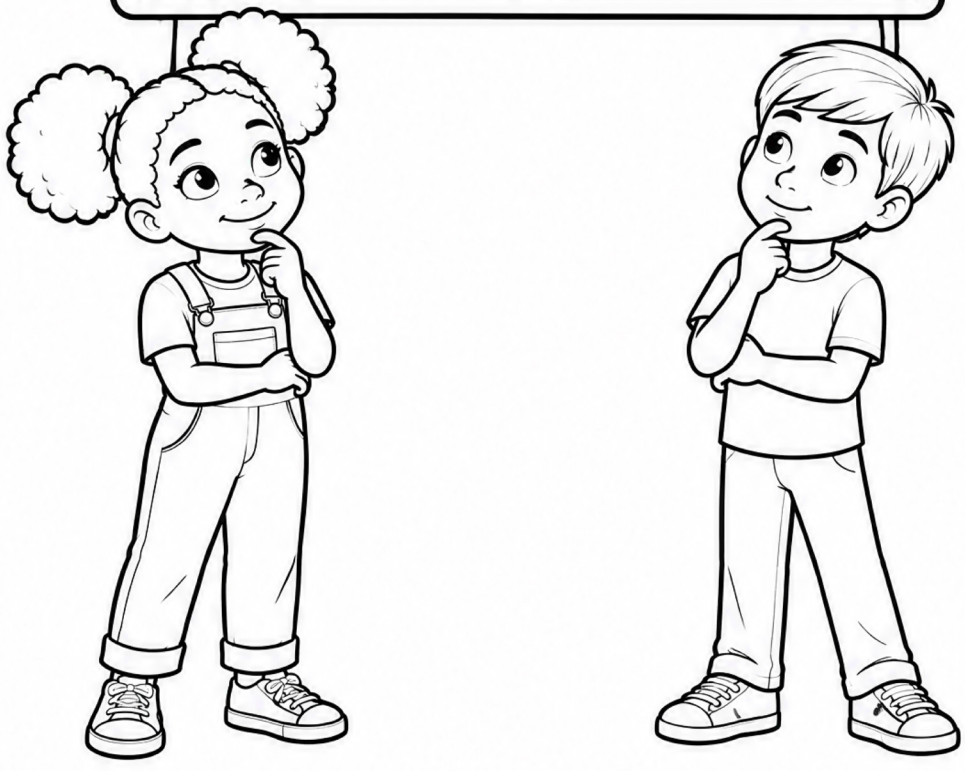

C

a Mailer that is smaller than a big box

D

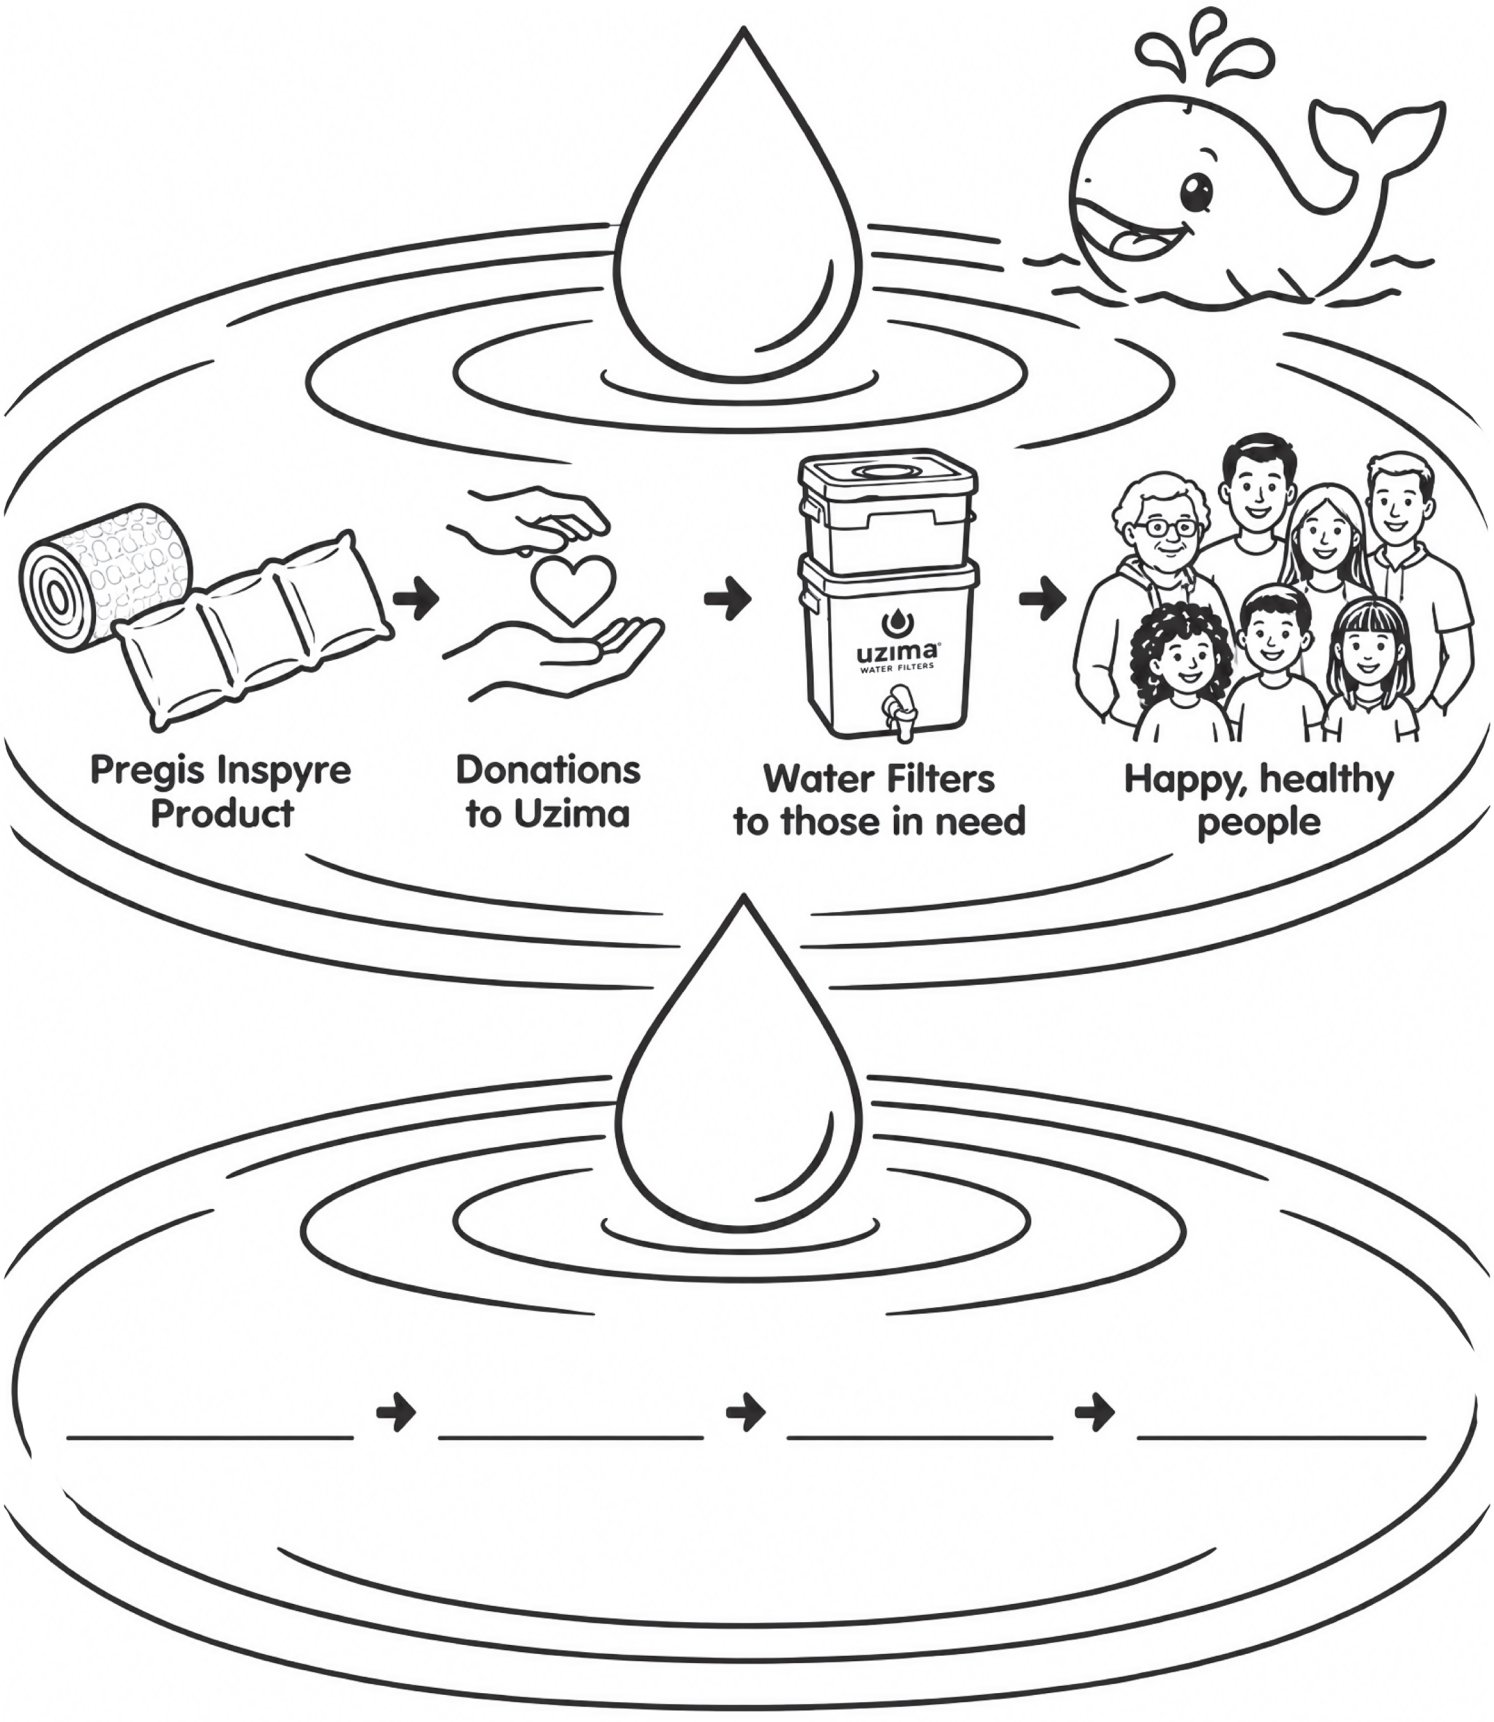

an Air Pillow that is made from material that was already used once

Using less material	Using material that has been used before
Using materials that the planet can make more of	**Materials that can be recycled**

YUMMY SNACKS
Finally, it's SNACK TIME!
Did you know that Pregis also helps in the creation of some of these snack packages?

So many things need packaging before they reach us. Circle the products that need protective packaging on their trip.
