

Pregis EasyPack® Quantum™ Pro

High-Volume Paper Void Fill

Pregis EasyPack® Quantum™ Pro is an on-demand paper void fill system built for high-volume environments. The Quantum Pro features the patented floating head design that made its predecessors so reliable by virtually eliminating paper jams.

Blade-less auto-tear is the newest innovation in the Quantum series – separating the paper for a packer to simply grab and pack!

Throughput

- High volume dispenser perfect for centralized fulfillment
- Magazine holds 5 bundles – 500 ft³ of packaging without changeover

Sustainability

- Curbside recyclable paper solution
- Offerings include FSC® recycled paper material

Reliability and Simplicity

- Virtually jam free maximizing uptime
- Simple interface with manual and automatic dispensing options

Packer Centric

- Auto-tear technology to simply grab and pack
- No blades or exposed parts keeps packers safe from harm
- Loads in seconds

Paper options

Item #	Bundle size	Formulations	Applications
