

Pregis IntelliPack® SmartShot™

Handheld Foam-In-Place System

Pregis IntelliPack® SmartShot™ handheld foam-in-place packaging system is designed for lower-volume or intricate applications. For increased flexibility, add the table stand to toggle between producing on-demand foam bags and handheld dispensing.

Ergonomic

- Tapered dispenser allows easy navigation, filling narrow or odd-sized space
- Insulated handle stays cool for operator's comfort

Superior Design

- Heated dispenser ensures a consistent flow of foam
- Durable mixing module is easy to clean, increasing uptime
- Clear drums show SmartFoam levels, preventing excess ordering, downtime
- Compact design saves floor space

Electrical Requirements

- Electrical Power: 208- or 230-Volts AC, 50/60 Hz, 30 amp dedicated circuit single phase
- Receptacle Type: L6-30

Hybrid Accessory

- Hand-held and bagging in one machine
- Multiple film widths for hand-held mode and three bag sizes

SmartShot Application
