

Pregis

AirSpeed® Ascent

HC Films

Providing ultimate protection

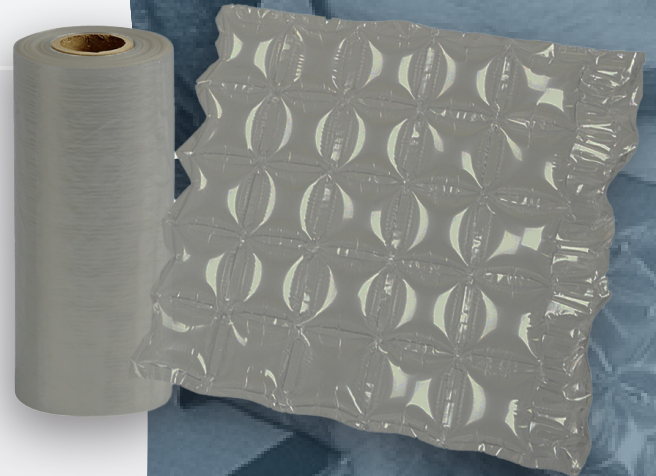

- Performance cushioning
- Contains recycled content
- Only high-pressure product which is 100% recyclable

Pregis HC film provides ultimate strength, durability, and air retention. The exclusive square pattern looks amazing and keeps items from “bottoming-out” to prevent damage. The square pattern has more surface area than competitive circular pattern products, providing superior cushioning throughout the transit cycle. It is perfect for heavy or fragile products that require extra cushioning. And its film technology offers superior air retention so it can be used for products that have longer shipping cycles.

The HC Renew film allows a high-quality protection thanks to the proprietary square pattern. The film is created with post-consumer recycled content. We strive for a circular economy and this recycled content embodies this. It is made from products that served end-users, it was sold on the market for a useful purpose after which it can be recycled. In other words: it is sustainable and circular... the print included! This is printed on each air cushion with a water-based ink, so it is not harmful to the environment. The colour of the air cushions is greyish. Its natural, without artificial colours and without hazardous ingredients. We are proud of it! The film complies with the European legislation for packaging and packaging waste: EN13427.

System

The AirSpeed® Ascent is the highest performing air system Pregis has ever created. It makes Hybrid Cushioning, an inflatable cushioning with a proprietary square pattern that provides superior product protection and an elevated customer experience.

AirSpeed® Ascent

Specifications

• Name	Ascent HC Renew 400 Small	Ascent HC Renew 800 Small
• Code	4088632	4087651

CUSHION

• % Recycled content	30	30
• Size of the cushion (mm)	400x200	800x200
• Thickness in micron	38	38
• Colour of the cushion	Grey	Grey
• Colour of the water-based print	White	White
• Material	LDPE	LDPE
• Recyclability	100% recyclable	100% recyclable

ROLLS

• Roll length (m)	381	250
• Roll width (mm)	400	800
• Roll core weight (kg)	0.75	1.4
• Roll weight including core (kg)	12.35	15.6
• Volume per roll (m ³)	2.8	4

PALLETS

• Rolls per pallet	30	24
• Number of layers per pallet	2	1
• Rolls per layer	18	24
• Pallet weight including pallet (kg)	425	404
• Pallet dimensions (LxWxH in cm)	120x80x110	120x80x99

Applications

Cushioning | Wrapping | Layering

Hybrid cushioning is made from low-density polyethylene, HC delivers unrivaled protection, a premium aesthetic consumers prefer and space savings as one pallet of HC is the equivalent of almost one-and-a-half truckloads of bubble!
