AirSpeed® MINI PAK'R® V3

## Renew™ Quilt Air Large

- Contains 50% Post-consumer recycled (PCR) content
- Multi purpose cushion

These AirSpeed Renew air bags are created out of 50% Post-consumer recycled content. It is made from products that served end-users, after which it has been recycled. The Renew film is transparent, because the resins used in these films originate from very clean sources, such as waste from supermarkets. This allows us to create an – almost – transparent air cushion out of post-consumer waste. The information is printed on each air cushion with a water-based ink, so it's not harmful to the environment.

- Size cushion: WxL = 400x150 mm
- Thickness: 23 micron
- Material: LDPE
- Complies with EN13427 standard for packaging and packaging waste
- Product code: 4090963

## Machine & Accessories

The **MINI PAK'R V3** is a compact and versatile machine producing air cushion on-demand. Compatible with Integrated Systems and a large range of accessories, the machine is the right solution for warehouses and distribution centers with multiple packing tables. Using RFID, the film settings are automatically selected, which make the machine easy to use.

Inflator

Mobile Fill

Top Fill

A Renew air cushion that allows a high-quality protection thanks to the air-transfer technology, which improves shock absorption.

Circular

Lowers CO<sub>2</sub> emission

EuCertPlast certified PCR

## Applications

• Wrapping

• Top layering

• Cross-layer
