## AirSpeed® Mini Pak'R™ Industrial

### Void-fill and light cushioning solution

The Pregis AirSpeed® Mini Pak'R™ Industrial is designed for areas where space is important. This simple to operate, compact on-demand air system will enhance your packaging operation and customer experience by increasing efficiencies and reducing damages.

- **Maximize uptime:** No wearable parts, less maintenance and more packing
- **Air-transfer technology:** Absorbs shock during shipment, as well as recovers from impact
- **Seal technology:** Ensures superior air retention
- **RFID technology:** Auto-adjusts machine settings for optimal results
- **Integration capabilities:** Fit your packing layout with accessories like an articulating arm or mounted c-frame
- **Double cushion film:** Flexible void-fill for top, side and corner protection
- **Quilt film:** Low-profile, moldable packaging for wrapping and light cushioning

## AirSpeed® Quilt Renew™ PCR

Pregis AirSpeed® Quilt Renew™ PCR elevates sustainable packaging with an impressive **80% post-consumer recycled (PCR)** content.

- **Protect the planet:** Reduce carbon emissions by over **40%**, fossil fuel usage by **65%** and water usage by **70%\***
- **Close recycling loop:** Post-consumer recycled content keeps materials in use that have completed their lifecycle, extending the life of plastics
- **Recyclable:** Designated with a How2Recycle® Store Drop-off label

\*Compared to virgin resin cushioning in a lifecycle analysis.

Products worth protecting deserve Pregis
