

CREATIVE MINES

MAKERS of STONE and MASONRY VENEER

WILDFLOWER Orchard Limestone
Architect: Marka Architecture
Interior Design: Tays & Co Design Studios
Photography: Taylor Hall O'Brien

Inspired by nature.
Crafted by hand.
Built to endure.

At Creative Mines, we layer texture, color, and form to create surfaces with timeless beauty and soul.

Strengthened from within by pozzolanic innovation, every piece is made to stand the test of time — in design, in performance, and in the way it makes you feel.

This is masonry veneer for those who believe spaces should inspire, comfort, and belong. For architects, designers, builders, and those creating the places they call home.

More beauty. More integrity.
More story in every surface.

SOLTERRA Mesa Modern
Design: Woodley Architectural Group
Builder: Davidson Communities

Mesa Modern adapts beautifully across architectural styles, from desert modernism to mountain modern homes and beyond. Ashlar stone forms establish a disciplined architectural rhythm, while irregular shapes and rugged textures introduce movement, depth, and natural variation.

SOLTERRA
Mesa Modern

Ridgewater Ledge expresses the layered character of natural stone through extended linear forms, split-faced texture, and pronounced shadow lines. Stones project and recede in varied relief, creating a dimensional surface that echoes the natural stratification of sandstone cliffs.

Inspired by Frank Lloyd Wright’s Fallingwater, one of architecture’s most celebrated expressions of harmony between structure and landscape.

Three curated palettes reveal the depth, shadow, and movement that define Ridgewater Ledge.

Board Form®

Flats: 6" High x 30" Long, 1 1/8" Thickness
Two Corner Sizes: 6" High x 11/8" Thickness
Outside Returns: 4" x 8" and 6" x 12"

Board Form now includes matching corner pieces, giving return walls and freestanding site walls a continuous, seamless appearance with no visible panel edges.

A modern nod to board-formed concrete. Hand-cast from rough-sawn planks, each piece captures the wood's natural grain and knotholes—preserving the texture of the original formwork. A unique alternative to poured concrete, Board Form brings warmth, depth, and architectural interest to any surface.
