

CARE AND MAINTENANCE | NATURAL STONE

How to care, maintain and enhance the natural beauty of Realstone post installation and on.

IMPORTANT: No Alkaline or Acid based cleaners should be used on natural stone. Use PH neutral cleaning products only.

POST INSTALLATION CLEANING

Any mortar on the surface of the stone should be cleaned up during installation before it has a chance to harden.

EVERYDAY CLEANING

Natural stone veneer requires little more than dusting or vacuuming and cleans up with simple soap and water or cleaning solutions specific to natural stone.

SEALING AND ENHANCING

Using an enhancer on your installation will bring out the deep color of the stone changing it to a richer, darker look.

A sealer or a sealing enhancer can be used in areas with heavy use like kitchen back splashes. A sealer can prevent staining on lighter colored stone and can ease clean up.

CARE AND MAINTENANCE PRODUCTS
