(\*) Excluding hydrofluoric acid and its derivatives.

(\*\*) Grout Joint Recommendations. Per TCNA Handbook, the minimum required joint width for ceramic tile and natural stone is 1/16".

Setting ceramic or stone without a grout joint of a least 1/16", often referred to as a butt joint, does not provide sufficient accommodation for dynamic building movement, differential thermal expansion, or allowable variation in fabrication or manufacturing.

(\*\*\*) Anti-Slip surface special order only.

COLOURED-BODY GLAZED STONEWARE

## INTENDED USE

### KEY

#### RESIDENTIAL

Kitchens, bathrooms, living rooms and other residential environments.

#### LIGHT COMMERCIAL

Offices, offices open to the general public, waiting rooms, shops, public bathrooms, common apartment block areas, restaurant dining rooms, car showrooms, bars, cinemas, surgeries/clinics, hotel rooms and bathrooms.

#### INTENSIVE COMMERCIAL

Common areas of shopping centres, hotel foyers, canteens, fast food restaurants, dance clubs, hospitals, schools, museums, places of worship, airports, stations.

#### OUTDOOR

Mainly for external areas that require flooring with anti-slip characteristics.

## PANARIA AND THE ENVIRONMENT

#### 100% REUSE OF UNFIRED TILES

Crude waste generated by the process is reintegrated in the production cycle with no costs for the environment. This contributes to the safeguard of natural resources.

#### PANARIA PACKING MATERIAL IS 100% RECYCLABLE

Carton boxes, plastic packaging materials, wooden pallets, straps, etc.

#### SAFETY REQUIREMENTS: NO FIRE REACTION

All of Panaria's ceramic tile products are Class A building materials as described in ASTM E84 - Standard Test Method for Surface Burning Characteristics of Building Materials. This is due to the flame spread rating of (0) and smoke developed rating of (0) falling within the ranges of a Class A material. Other building codes refer to this as a Type I material in accordance with NFPA 255.

#### 100% REUSE/RECYCLING OF THE INDUSTRIAL WASTE - FIRED TILES

The waste-fired tiles are fully reused in the production cycle. In addition, at the end of life, the tiles Panaria can be recycled as materials for substrates for roads and buildings, thus reducing the use of gravel and natural aggregates commonly used in building.

#### 100% OF NON CERAMIC WASTE

Is differentiated and recycled in other production cycles.

#### METHANE CONSUMPTION IS HIGHLY REDUCED

By the use of up to date technologies and customized installations.

#### 100% WATER RECYCLING

The water used in the production process is recycled. The water demand is strongly reduced by this mean.

#### LOW EMISSIONS IN THE ATMOSPHERE

Panaria production plant strictly complies to US Standards with a very small amount of gas emissions in the atmosphere.

**PANARIA CERAMICA** is a member of the U.S. Green Building Council: this is an organisation that promotes buildings that are environmentally responsible, profitable and healthy places to live and work. LEED card SUITE series is available on request.

**GREENGUARD CERTIFICATION**  
Panaria SUITE series is made in a production plan GOLD GREENGUARD certified.

**ENVIRONMENTAL PRODUCT DECLARATION**  
This Environmental Product Declaration is provided by Tile Council of North America (TCNA).
