# NETZERO<sup>TM</sup>

## FIRE

# THE ULTIMATE VISUAL EXPERIENCE

---

The NetZero E-one gives you a unique sensory experience, unlike any electric fireplace you've seen before. You'll be drawn in by the virtual holographic flames that dance against the sculpted logs.

3D illumination captures the appearance and mood of real wood fire behind a large glass front that makes it feel like a true hearth.

A modern living room with a fireplace. The fireplace is a long, low-profile unit with a dark frame, set against a textured grey wall. A fire is burning brightly in the hearth. The mantel is a wide, light-colored concrete slab. On the mantel, there is a vase with dried branches, some pinecones, and a small decorative object. To the right of the fireplace, there are logs of wood. In the foreground, there is a light-colored sofa and a matching ottoman. A small, quilted cushion is on the floor. The floor is made of dark wood planks. The overall atmosphere is warm and contemporary.

NEXT-LEVEL  
REALISM

A SIZE FOR  
**EVERY STYLE**

E-one 130F

E-one 130B

# AN IMMERSIVE SENSORY REVOLUTION

---

The game-changing realism of the E-one is available in seven sizes/styles. The 100F, 130F, 160F and 190F feature front glass viewing, while the 130B, 160B and 190B are a bay style with three-side viewing. For specs, see the back cover.

Whichever one you choose the go-anywhere design of the NetZero E-one simplifies installation, without the need for venting or gas lines. Bring this sensory wonder of fire to almost any space. And feel good about doing it.

# UNLOCK THE POWER OF HOLOGRAPHIC FIRE

---

Enjoy the immersive beauty of holographic fire with the sustainable benefits of zero emissions, zero fossil fuels and low energy consumption. Now, you can make a big impact in your home environment—with less impact on the one we all share.

The E-one is at home whether you live in a country farmhouse, a cozy craftsman or a condo on the 15th floor. The flames entice you to gather and turn moments into memories.

MAKING FIRE  
ELECTRIC

# UNPRECEDENTED VIRTUAL DEPTH OF FLAMES

---

The E-one is a contemporary electric fireplace with an ultra-realistic fire thanks to the first electric dual holographic flame fields. It brings depth to the fire that will have you forgetting it's plugged into the wall.

It's so low maintenance it's practically no maintenance. There's nothing to refill and nothing to upkeep, besides the occasional dusting and glass cleaning.

# IGNITE YOUR SENSES

---

Own the moment and match your mood with an array of adjustable settings.

Customize the flame height and tone, the intensity of the glowing embers, interior lighting and the realistic crackling sounds of burning wood. All with our intuitive remote that makes the NetZero E-one “on-off” easy.

You can even add a little warmth on a chilly evening with the Atmos Heating system or just enjoy watching the dancing flames in warmer months with the touch of a button.

# CREATE YOUR UNIQUE FIREPLACE EXPERIENCE

Enjoy the calm of lower flames on a quiet evening at home.

Bring energy to the room with flames on the highest setting.

# NETZERO Eone

### The NetZero Fire™ and Kalfire Story

E-one is powered by a partnership between NetZero Fire™ and Netherlands-based Kalfire to bring their patented flame technology to North America. It's a relationship built around a shared passion for creating hearth experiences that bring families together, through fireplace designs that are both beautiful and sustainable. Together, these two family-owned companies ensure the timeless appeal of fire will be enjoyed by generations to come.
