MAINTENANCE

CERAMIC TILES

Clean the tiles regularly with a non-abrasive/non-acidic, mild and PH neutral cleaner.

We recommend **FILA CLEANER – Neutral Cleaner** (available in our Price List) for all cleaning purposes of our tile.

Reapply sealer to grout joints and crackle glazes periodically as needed. When water no longer beads on the surface of the joints, resealing is required.

GLAZED PORCELAIN TILES

Clean the tile regularly with a non-abrasive/non-acidic, mild and PH neutral cleaner.

We recommend **FILA CLEANER – Neutral Cleaner** (Available in our Price List) for all cleaning purposes of our tile.

Use products which are suitable to eliminate the remains of mortar, cement, etc. Never use an acidic cleaning agent on newly installed flooring because the acid reacts with the unset cement and can damage the seals, or insoluble compounds can be deposited on the surface of the paving.

Do not use metal scrapers or abrasive pads.

Daily cleaning, after use, will be made particularly easy as it only requires clean water and a very well-wrung cloth. In areas where the tile could be especially messy (kitchens), a detergent with bleach or ammonia can be added to water, although in this case we always recommend giving a final rinse with clear water. Do not use waxes, oils or similar products. In some cases, we can find ourselves in the situation of having to clean very dry and specific stains, which cannot be removed with a damp cloth, but that will disappear if we apply concentrated bleach (the one for floors, not the one used for clothes) and leave it to dry. For especially resistant stains it may be necessary to repeat the process.

For floor surfaces; water, grease, oil, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection and maintenance.

PLEASE NOTE

Due to the nature of our tile, a certain amount of variation in color, shading, surface and texture are to be expected.

Use of the tile constitutes acceptance. We assume no responsibility for installation.

The installation information provided is to be used as a guideline only and should be discussed with a professional and accredited tile installer.
