

MEET McLAREN

BREAST CARE CENTER

Located adjacent to the Harrington Medical Center, the McLaren Macomb Breast Care Center offers a personalized, comprehensive and multidisciplinary approach for breast care. All of our physicians, clinicians and support team members are highly trained and attuned to women's health needs, with clinical expertise in breast health.

From easy parking to individual consultation rooms and private dressing areas, patients at the McLaren Macomb Breast Care Center will find a private, comfortable setting for care.

Services designed to improve patient comfort include:

- Bone density testing
- High-risk assessment (Volpara) and access to genetic testing and counseling services
- ABUS breast ultrasound scan to find cancers in dense breast tissue
- Leading edge digital mammography technology
- Upright stereotactic mammography unit to identify small targets for biopsy and tissue marking
- Mammotome magnetic seed implantation system for tumor marking

BENEFITS OF THE BREAST CENTER

- One location for diagnostic testing and biopsy
- Multidisciplinary approach including breast imaging radiologists, surgeons and a comprehensive tumor board
- Seamless integration with KCI and treatment options (radiation oncology, medical oncology, clinical trials)
- Online scheduling at:
mclaren.org/MacombBreastCenters or (800) 625-2736
