

MEET McLAREN SWING BED PROGRAM

EMPOWERING PATIENTS TO RECOVER SAFELY AND CONFIDENTLY

The Swing Bed Program at McLaren provides 24/7 specialized skilled nursing care and rehabilitation services including physical, occupational, and speech therapy that would traditionally be received at a separate skilled nursing facility.

This transitional care is ideal for patients who no longer need acute medical care but aren't yet strong enough to return home, providing the essential bridge to recovery in a familiar, comfortable setting.

We accept qualified patients from both our facility and outside hospitals. Our program provides the necessary support to help patients safely regain the strength and independence needed for a successful discharge.

CONDITIONS TREATED

Admission is primarily based on the need for daily skilled care, as determined by a physician, rather than a specific diagnosis. The Swing Bed Program allows us to provide this continued post-acute care following an inpatient hospital stay.

Patients presenting with, but not limited to, the following diagnoses and associated needs may qualify for admission.

- Orthopedics (fractures, post-surgery)
- Post-Stroke
- Congestive Heart Failure (CHF)
- Pneumonia
- COVID-19

SWING BED PROGRAM

LOCATIONS

McLaren Thumb Region

1100 S. Van Dyke Rd
Bad Axe, MI 48413

Phone: (989) 269-1515
Fax: (810) 600-7539 Fax
