MEET McLAREN

HEMATOLOGIC AND MEDICAL ONCOLOGY

CANCERS TREATED

Any cancer can be treated with drug therapies. A brief list of cancers that our medical oncologists specialize in are:

- Hematologic Oncology and Heme Malignancies – blood cancers
- Germ Cell Tumors – these usually form in reproductive organs and rarely elsewhere
- Bone/Musculoskeletal – form in the bone tissue
- Gynecologic – our medical oncologists work with the gynecologic oncology team to provide comprehensive treatment plans for women who have these types of cancers
- Breast
- GI Malignancies
- Head and Neck
- Genitourinary – form in the urinary or genital organs
- Respiratory/Thoracic
- Skin

TYPES OF TREATMENT

- Antibodies
- Chemotherapy
- Hematologic Disorders
- Hormone Blocking Therapy
- Immunotherapy
- Targeted Therapy Drugs

To schedule an appointment, call **(810) 235-8568**
