

MEET McLAREN ONCOLOGY SERVICES

KARMANOS CANCER INSTITUTE
AT McLAREN FLINT

KARMANOS CANCER INSTITUTE AT McLAREN FLINT

The Karmanos Cancer Institute at McLaren Flint is part of the Karmanos Cancer Network, anchored by the Barbara Ann Karmanos Cancer Institute in Detroit, a National Cancer Institute-Designated Comprehensive Cancer Center. That affiliation means our patients have access to more than 250 promising new cancer-specific treatments not often found at other hospitals or health organizations. Together, we give your patients their best chance.

CLINICAL TRIALS

Karmanos Cancer Institute has hundreds of scientific investigation programs and clinical trials available, including those for prostate, bladder, and urinal cancers, and proton therapy. Patients have the option of participating in clinical trials. Patients go through a screening process with a clinical trial specialist and a physician to determine whether they can participate in specific trials. To learn more, visit karmanos.org/clinicaltrials.

GENETIC TESTING

Genetic counseling services help patients and their families learn about the impact their personal and family histories have on their risk of developing cancer.

Genetic testing also helps the patient understand prevention, early detection, and treatment options.

For more information, call **(810) 342-3854**.

mclaren.org/protontherapy

The McLaren Proton Therapy Center, which offers the most powerful and precise radiation oncology treatment available, is part of the Karmanos Cancer Network. Our highly skilled and experienced team of cancer specialists works collaboratively to provide an individualized treatment plan for each person's unique cancer and situation. This advanced technology delivers radiation to cancer cells with less risk of damage to healthy tissue, meaning less risk of side effects. As a result, patients experience successful outcomes and a better quality of life during and after treatment.

The Karmanos Cancer Institute at McLaren Flint Surgical Oncology Program provides advanced, comprehensive care. Specializing in a wide range of surgical procedures, the program is at the forefront of innovative treatments, particularly in breast surgery, gynecological oncology, head and neck oncology and surgical oncology which includes the gastrointestinal tract, skin cancers, breast, HIPEC, and soft tissue and endocrine malignancies. Our team of surgeons works closely with medical and radiation oncologists to create personalized treatment plans, ensuring the highest level of care. Whether performing breast-conserving surgeries or complex procedures, Karmanos remains committed to delivering cutting-edge, patient centered care that enhances outcomes and improves quality of life.

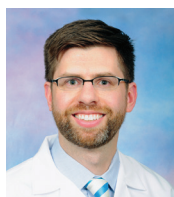

We provide specialized, minimally invasive surgery, including robotic-assisted techniques for smaller incisions and enhanced precision. Our advanced 3D imaging technology allows for greater control in delicate procedures.
