

clarion®

A Domtar Brand

Introducing the **1st phenol-free** thermal receipt paper that **looks & performs the same as standard POS paper** and is **certified recyclable**.

Brought to you by Domtar,
one of the most trusted
names in paper.

The first phenol-free thermal receipt paper to be certified recyclable by the Western Michigan University standard.

Clearly the
right choice

Clarion® makes the right choice—the clear choice.

Phenol-free

- Formulated with a developer system free of phenols
- Clarion® thermal receipt paper products are BPA, BPS and phenol-free

Certified Recyclable

- The first phenol-free thermal receipt paper to be certified as recyclable by the WMU standard
- Recyclable across all paper grades
- Clarion® thermal paper can be recycled with other paper products where locally accepted, helping simplify recycling.

Same Great Performance

- Clarion® thermal paper has the same great performance and bright, white shade that your customers are accustomed to
- The only phenol-free thermal paper that matches the performance of standard POS papers
- Clarion® thermal paper is white on the back and front, making it backside printable which is perfect for end users to add brand messaging, advertising or environmental compliance messaging
- Works with flexographic printing for both front and back
- Under proper conditions, thermal paper has a shelf life of up to 3 years before use and printed images remain legible for up to 10 years.

Made in the USA

- Clarion® thermal paper is proudly manufactured in Bennettsville, SC and coated at Domtar's West Carrollton, OH facility
- Getting your Clarion® phenol-free thermal paper from a reliable domestic partner means you'll always have the products when and where you need them
- Made in the USA with domestic and globally sourced materials

Domtar

Clarion® thermal paper is a Domtar Brand. Domtar prides itself on operational excellence and delivering sustainable, high-quality products to meet and exceed customer needs globally. The company is committed to turning sustainable wood fiber into everyday essential products.

Clarion® thermal paper is designed to be recyclable and has demonstrated recyclability through independent testing. Actual recycling outcomes depend on local collection programs, consumer participation, and whether receipts are accepted by municipal recycling systems.
