100% Recycled
Containerboard
from Domtar

Partnering for Your Success

Domtar's premium, 100% recycled performance liner and medium deliver exceptional strength with less fiber, helping you create high-quality packaging that supports your sustainability goals.

Domtar is dedicated to true partnerships with independent corrugated converters, strengthening your business and driving success.

Why Choose Our 100% Recycled Containerboard?

Exceptional performance using less fiber

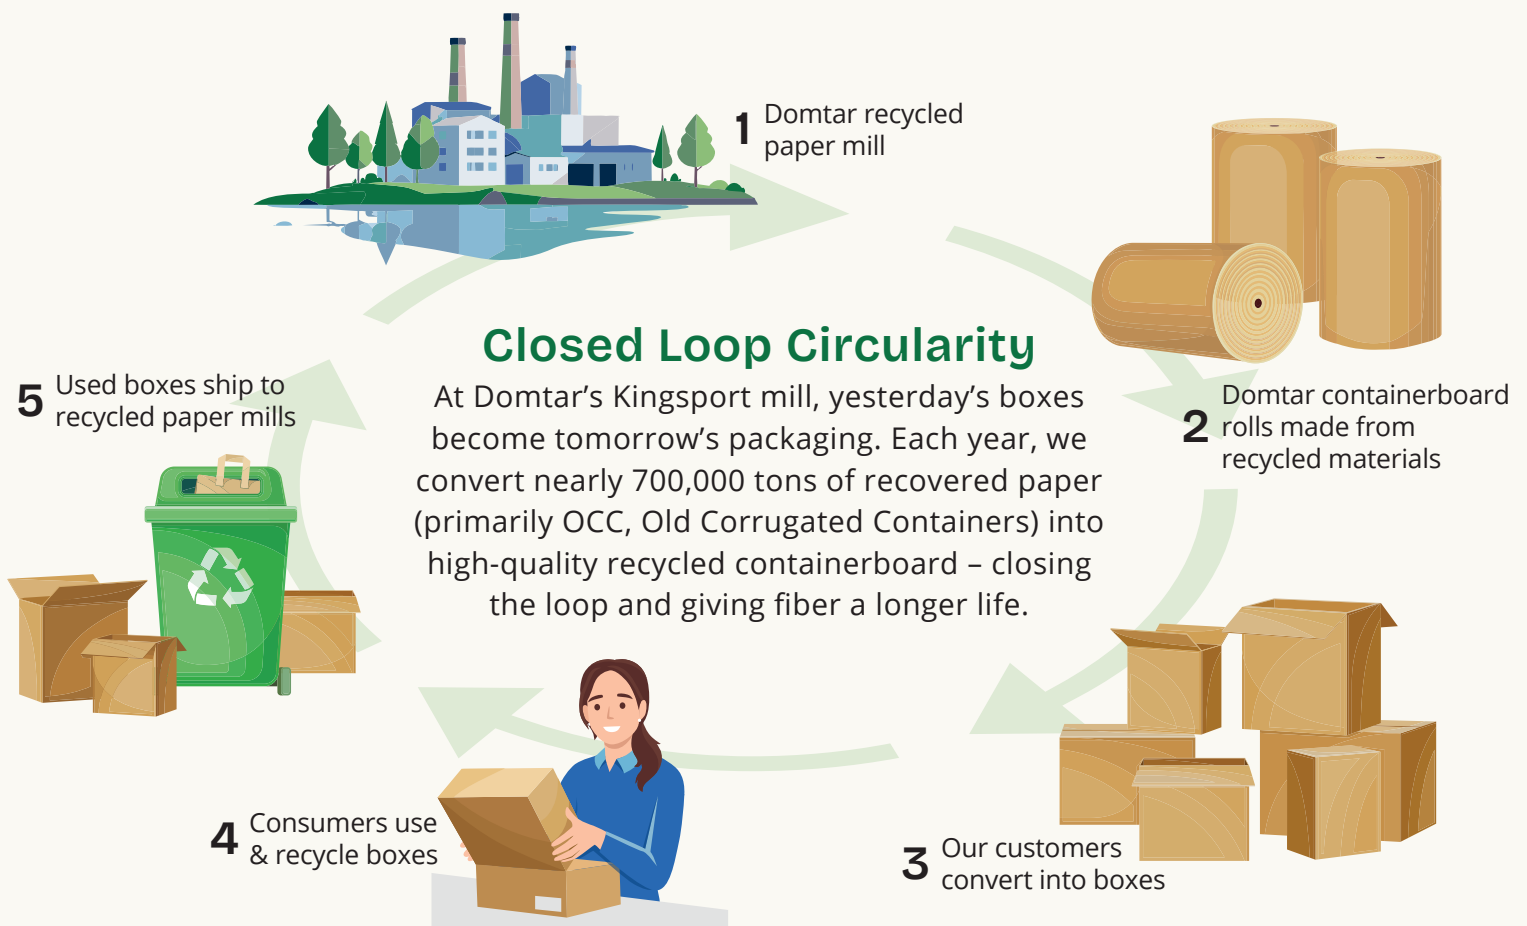

With product properties that include a high strength-to-basis weight ratio, Domtar's 100% recycled linerboard and corrugating medium are optimized for great performance even at lighter weights.

Domtar's first 100% recycled containerboard mill

In 2023, we transformed our Kingsport, Tennessee, mill from a virgin uncoated freesheet facility into a 100% recycled containerboard operation. This process uses minimal chemicals and 70% less water.

Sustainability strengthens your brand

At Domtar, we strive to put sustainability at the heart of everything we do. Our containerboard products are made of 100% recycled fiber, enabling our customers to participate in the closed loop circular economy of recycling.

100% Recycled Performance Linerboard

Our linerboard exhibits high STFI values, excellent runnability, and outstanding print performance.

- Strength characteristics allow for the substitution of lighter basis weights without reducing performance
- Offered in basis weights from 18.5 lb to 42 lb
- Certified to FSC® (FSC®C001844), SFI® and PEFC Chain of Custody Standard for Recycled Paper

100% Recycled Performance Medium

Our corrugating medium grades offer excellent strength. This product is engineered for exceptional runnability and Concora strength characteristics that allow for using a lower basis weight. By reducing overall fiber usage and incorporating recycled content, Domtar helps customers work toward their sustainability goals while maintaining high performance.

- Optimized for production of high-performance packaging that minimizes waste
- Offered in basis weights from 18.5 lb to 33 lb
- Certified to FSC® (FSC®C001844), SFI® and PEFC Chain of Custody Standard for Recycled Paper

Kingsport Mill

The mill is home to the second-largest recycled containerboard machine in North America.
