

CLSI EP47TM

Evaluation of Reagent Carryover Effects on Test Results

CLSI EP47 provides guidance for planning, performing, evaluating, and documenting reagent carryover experiments and guidance for ensuring that no significant reagent carryover occurs.

A guideline for global application developed through the Clinical and Laboratory Standards Institute consensus process.

Clinical and Laboratory Standards Institute Setting the standard for quality in medical laboratory testing around the world.

The Clinical and Laboratory Standards Institute (CLSI) is a not-for-profit membership organization that brings together the varied perspectives and expertise of the worldwide laboratory community for the advancement of a common cause: to foster excellence in laboratory medicine by developing and implementing medical laboratory standards and guidelines that help laboratories fulfill their responsibilities with efficiency, effectiveness, and global applicability.

Consensus Process

Consensus—the substantial agreement by materially affected, competent, and interested parties—is core to the development of all CLSI documents. It does not always connote unanimous agreement but does mean that the participants in the development of a consensus document have considered and resolved all relevant objections and accept the resulting agreement.

Commenting on Documents

CLSI documents undergo periodic evaluation and modification to keep pace with advances in technologies, procedures, methods, and protocols affecting the laboratory or health care.

CLSI's consensus process depends on experts who volunteer to serve as contributing authors and/or as participants in the reviewing and commenting process. At the end of each comment period, the committee that developed the document is obligated to review all comments, respond in writing to all substantive comments, and revise the draft document as appropriate.

Comments on published CLSI documents are equally essential and may be submitted by anyone, at any time, on any document. All comments are managed according to the consensus process by a committee of experts.

Appeal Process

When it is believed that an objection has not been adequately considered and responded to, the process for appeal, documented in the CLSI Standards Development Policies and Processes, is followed.

All comments and responses submitted on draft and published documents are retained on file at CLSI and are available upon request.

Get Involved—Volunteer!

Do you use CLSI documents in your workplace? Do you see room for improvement? Would you like to get involved in the revision process? Or maybe you see a need to develop a new document for an emerging technology? CLSI wants to hear from you. We are always looking for volunteers. By donating your time and talents to improve the standards that affect your own work, you will play an active role in improving public health across the globe.

For additional information on committee participation or to submit comments, contact CLSI.

Discover How CLSI Can Improve Your Organization

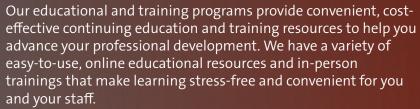

The leading source for the latest medical laboratory standards.

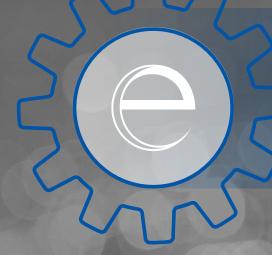

CLSI membership lets you directly impact best practice standards used to improve patient care worldwide—standards you use every day. Membership provides you with standards access, volunteering opportunities, influence in the standards development process, networking opportunities, discounts, and more.

Discover the membership option for you at clsi.org/join.

See our current offerings at clsi.org/global-training.

Ensure high-quality laboratory testing with CLSI standards. eCLIPSE Ultimate Access™, our complete online library of standards, makes it easy for you and your staff to quickly find the CLSI resources you need. Read, search, link, annotate, bookmark, and share notes with your staff, all within one easy-to-use platform.
