

Spark creativity with flexibility

Make your meetings more memorable and actionable with whiteboards in Webex.

See your ideas come to life

Whiteboards allow everyone in the meeting to visualize and contribute, in real time. It's just like back in school, except that on Webex you can:

- Draw on an infinite canvas without running out of space or erasing your work
- Change the canvas color
- Add sticky notes without the waste
- Work together on the same board whether you join from the Webex App, a browser, or a device
- Save and share whiteboards across Webex or email later

Ideas that inspire

Here are just a few ways you can use whiteboards:

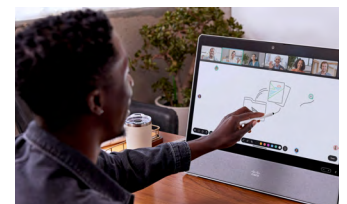

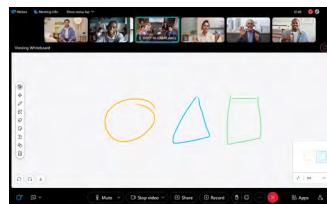

- Brainstorming and problem-solving sessions
- Build a mind map to organize thoughts and concepts
- Take visual notes to keep everyone engaged
- Play a drawing game for virtual team building fun

Keep up the flow beyond meetings

Whether it's for day-to-day project management, workshopping a new plan, or during an impromptu meeting, whiteboarding can help generate new perspectives and on-the-spot thinking.

Keep continuity in the creative flow—start a new whiteboard or select an existing whiteboard to work on and pick up where others left off.

Do you have people working across time zones? Break down geographic barriers and give everyone an opportunity to express their ideas. Your team can search, edit, and share whiteboards when it's convenient for them, to keep work moving.
